NITROUS POWER

Don't get stuck out on the trails or on the side of the road because of a battery failure, our NITROUS POWER jump starter can get you up and running quickly and easily. Most UTV's are pretty much impossible to start if their battery dies, so unless you have someone to jump your vehicle in that situation, plan for a long walk. Designed to be used as a back up battery and a charger for your devices this product provides plenty of amperage to start most vehicles. Cars, trucks, UTV's, ATV's, motorcycles, boats, the battery in our pack provides more capacity than some vehicles stock batteries. Its USB's will power up or charge devices quickly with its 2 amp ports. The built in super bright LED's provide a work light or lantern function.

AAC was created to provide quality products that will give our customers confidence in their vehicles and help them enjoy their investments.

Power Up your vehicle with Nitrous Power!

Provides 2 USB ports, a 12 volt output, and the jumpstart function. One port is for charging and the button controls the LED and pack charge level indicator. Jumpstart cables store inside case so they're there when needed.

ADVANCED ACCESSORY CONCEPTS

Yamaha Wolverine

Ram 1500 rear seat install

Jumpstarter in use on motorcycle. Cables store inside body and include a reverse polarity protection circuit.

Features:

- 11200 mAh Lithium battery pack inside. Provides 400 amps peak, 200 amps continuous.
- 2 USB ports rated at 2 amps each and a 2.1 mm output plug for charging or powering devices.
- Sturdy heavy wall injection molded housing for strength and durability.
- Patented Watertight design so it can be mounted most anywhere.
- Rigid mount included with threaded knobs for quick removal of the pack. Can be easily hardwired to the vehicle so it charges whenever the engine is running.
- Lid can be removed while pack is in the mount for use without having to remove completely.
- 4 Cree super bright LED's provide a work light or lantern function.
- 1 year warranty against manufacturers defects

Super Bright Cree LED's provide light when you need it.

NITROUS POWER Hidden Storage Container

BONUS!

**Cree LED Flashlight
Now Included**

Includes tool roll!*
*Tools not included

Storage in off-road vehicles can be limited, and valuables can be hard to store with confidence. Our Nitrous Power Hidden Storage container gives you a place to hide valuables that's easy and unique. You can use it to store tools and other items in the included tool roll, which will keep them from banging around loose in a door or glove box.

The authentic design will keep your items safe from potential theft, and the sealed lid will even keep moisture out if used in inclement weather.

Built from solid, heavy walled ABS, with steel threaded knobs in the mount, and rubber seals to keep out moisture. The mount includes holes to facilitate simple hard mounting as desired. A canvas styled tool roll with folding flap and ties to keep items contained, and as a Bonus! A Cree LED aluminum, adjustable focus flashlight will be included.

Includes: Nitrous Power bottle, tool roll, solid mount, and as an introductory special, an adjustable focus Cree LED flashlight.

NITROUS POWER

Heavy duty ABS construction. Lid includes rubber seal to keep out moisture. Tool roll included.
