

**PN: GR13GFG71T**  
**2010 Mazda CX7 Main Upper**

Hardware

4 -- 6-32×1" Studs

4 -- Flat Tabs

4 -- 6-32 K-Lock Nuts

- (1) Open the hood and remove the plastic push pins from across the top of the bumper cover for access to the upper grille mounting hardware.
- (2) Remove the air deflector from the passenger side of the factory upper grille opening (if equipped).
- (3) Apply protective masking tape around the factory upper grille openings to protect the paint finish.
- (4) Thread a stud in each nut welded to the grille. Align the mesh section and surround into the factory upper grille opening, making sure the mesh fits tightly against the factory grille. Be careful not to cut through the protective tape.
- (5) On the passenger side, it will be necessary due to the factory intercooler air deflector (Turbocharged Models only) to raise the mesh and frame as high as possible to install the flat tab and the 6-32 k-lock nuts onto the stud.

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
