

CM088-G17

Arkon GPS Car Mount for Garmin nuvi 40 50 200 2013 24x5 25x5 Series 15 inch Flexible Steel Seat Rail or Floor Mount

DESCRIPTION:

The CM088-G17 seat rail or floor car mount is compatible with Garmin nuvi devices having the 17mm swivel ball mounting pattern, including models in the 40, 50, 200, 2013, 24x5, and 25x5 Series, as well as Garmin nuvi models 1450, 1450T, 1490T, 1200, 1250, 1260T, 1300, 1350, 1350T, 1370T, and 1390T. (The above listed Garmin nuvi devices should include a 17mm swivel-ball-compatible mount bracket; replacement brackets and holders sold separately by Arkon.) This mount package includes only Arkon's 15-inch Flexible Steel Seat Rail or Floor Mount. The car seat rail or floor mount is made of strong yet flexible steel, and is ideal for service vehicles, trucks, or those who need easy access to their devices but prefer mounting them somewhere other than the windshield or dashboard. The mount measures 18 inches end-to-end with a 15-inch flexible gooseneck. Use a socket wrench to install the mount to the car's seat rail. Loosen the passenger seat track bolt, insert the included seat track bolt bracket, and then retighten the bolt. Bend the 15" gooseneck and rotate the swivel ball adapter head for 360-degree rotation for exact positioning of the device. Optional floor brackets and screws are included for screwing the mount directly into the floor of the vehicle. (Warning: Drilling into the vehicle's floor may damage the vehicle. Use caution and consult a mobile install professional to avoid drilling into any sensitive vehicle components.)

FEATURES:

- Compatible with Garmin GPS devices with a 17mm ball mount base
- 15 inch gooseneck and swivel ball provide ideal positioning of device
- Strong yet flexible steel mount recommended for service vehicles and trucks
- 2 year limited warranty
