

TWBRVGP

Arkon TW Broadcaster Desk Stand for GoPro and iPhone for Live Streaming Retail Black

DESCRIPTION:

The recent integration of the GoPro HERO4 on Periscope has opened up a number of new live streaming possibilities, and Arkon's TW Broadcaster Desk Stand is a must-have accessory for live streaming with a GoPro action camera and iPhone. TWBRVGP features a GoPro mount that is compatible with all models of the GoPro HERO action camera, including GoPro HERO4 Black and Silver. To install the GoPro, just set it into the lateral screw pattern and secure with the screw and acorn nut. The mount adjusts vertically and provides 360° rotation, providing flexibility in positioning the GoPro camera at any angle. The telescoping shaft extends upward from 7.5 to 9.75 inches tall. Positioned side-by-side with the GoPro action camera is Arkon's RoadVise universal phone holder, which is compatible with all phones weighing up to 2 pounds and measuring up to 4" wide, including the Apple iPhone 7, iPhone 6S Plus and 6 Plus, iPhone 6S, 6, 5S, and SE. This positioning makes it easy to toggle back and forth between the GoPro and iPhone as needed. Arkon strongly recommends using the RoadVise Holder with smartphones that have skins and ruggedized cases attached. This ensures a secure grip in the holder and protects your iPhone. The low-profile RoadVise holder was intentionally designed to require two hands to install and remove the phone from the holder. This feature ensures that your phone is not accidentally removed while live streaming using the mount. Now that you can use a GoPro HERO4 with Periscope, the locations and scenarios you can broadcast from are endless. Whether you're presenting at a conference, teaching in a class, or live streaming from the home or office, the TW Broadcaster Desk Stand for GoPro and iPhone is the must-have companion accessory for live streaming with Periscope and Facebook Live.
