# MEAN MACHINE

The Mean Machine offers a nearly limitless customization of the [crossovers and equalizers](#) which helps tailor to the sound to every enthusiast for any music.

## Mean Machine Features:

- Pro-Fi™ High Speed MOSFET's
- Auto-Step PWM MOSFET Power Supply
- ROAD WORTHY™ TCID
- Fully Adjustable Pro-Design Crossovers
- Line Output for Amplifier Daisy Chaining
- Bass Thrust - Variable Bass Equalization
- 24dB Subsonic Filter
- Bass Remote Included in Mono Amplifiers

# STREET MACHINE AMPLIFIERS

## Street Machine Features:

- Fully Adjustable 12 dB Crossovers
- Bass Remote Included with Mono Models
- Adjustable High Pass, Low Pass,
- Subsonic Filter and Bass EQ

Street Machine amplifiers are a perfect balance of power, sound quality and convenience. The SMA amplifiers are all Class A/B design with 2 and 4-channel bridgeable models. Additionally, there are large mono amplifiers that will drive subwoofer systems deep and loud will plenty of power in reserve for those peak moments in the music.

# TA AMPLIFIERS

## TA Amplifier Features:

- High / Low Level Inputs
- Bass remote included on mono amplifier
- Heat Resistant Black Finish
- Class A/B & Class D Technology
- Pro- Fi™ High Speed MOSFET Devices
- Sound Shield™ Heatsink Technology
- On board 12dB electronic crossover
- Built-in Bass EQ at 45Hz
- 1 ohm stable (TA2050.1D)

The Autotek TA Series of amplifiers are designed to deliver great sounding music without all the frills and specialized features that you may not need in a system that just needs to hammer our great music without distortions. The TA Series are full Class A/B technology in stereo and four channel amplifiers along with Class D in the mono.

# ATS SPEAKERS

## ATS Speakers Features:

- Neo-Mylar Soft Dome Tweeter with impact resistant phase lens
- Polypropylene Cones with UV Resistant Rubber Surrounds
- Anti-Resonant Stamped Steel Frame
- 12dB External Crossover on Component System

ATS series speakers are available in the most popular sizes to fit into factory speaker locations with **very** little or no modification. They are perfect for the first car or a full restoration. They are designed to easily disappear into the stock speaker locations. Look closely for durable moisture-resistant foam speaker surrounds, bass enhancing polypropylene cones, and super output neo-Mylar soft dome tweeters. ATS speakers will not bust the bank either which means great sound at a great price.

# ATW SUBWOOFER

Big motor, more power. The philosophy of engines and the philosophy of the Autotek Woofer or ATW are the same. A bigger motor - the magnet and voice coil former, means more bass power can be pushed through from bigger amplifiers. Additional bass engine power comes from the reinforced cone and rubber surround.

## Subwoofer Features:

- PVC Gasket
- THERMOPoly Dust cap
- Rigid Polypropylene Cone
- Black Foam Surround
- 2.0" Voice Coil
- Nickel Plated Terminals
- Steel TREAD Frame
- Vented Motor
