

Space-saving automotive fuses

Bussmann series superior micro fuses provide protection while consuming minimal space.

Product description:

New vehicles are incorporating more electronic circuitry, which requires more protection. With space at a premium, many new vehicles now use micro fuses.

In addition to their small footprint, micro fuses have the capability to withstand temperatures ranging from -40°C to +125°C (-40°F to 257°F), making them ideal for vehicles in extreme environments.

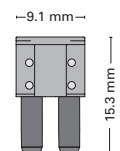

Bussmann™ series ATR (2-blade) and ATL (3-blade) fuses are rated to 32 volts and constructed of nylon with silver-plated zinc alloy terminals. Bussmann series FMM (micro female Maxi™) fuses are also rated to 32 volts, but are constructed of PA6T with tin-plated copper terminals.

Features and benefits:

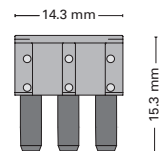

- Fuses are color coded by amp rating for easy identification.
- ATR fuses provide single-circuit protection.
- ATL fuses provide dual-circuit protection in a single product.
- FMM fuses are the smallest female Maxi cartridge fuses in the market.
- Broad portfolio of micro fuses provides solutions for most applications.
