

Installation Instructions

Step Boxes

Read these instructions and warnings before installation.

Please note:

1. When mounting your step box you must use the provided additional mounting brackets located on the rear inside corners of the step box.
2. These brackets are provided for drilling and to be used in conjunction with bolts and nuts for best results. We recommend at least 7/16" bolts as a minimum for adequate mounting.
3. If these interior brackets are not utilized additional mounting brackets must be used under the box for proper support. If any other means of mounting is used any warranty claims may be void

DANGER

Do not use this toolbox for the storage or transportation of flammables, explosives, hazardous waste or materials such as gasoline, solvents, gun powder, dynamite, propane tanks, acetylene tanks or cutting torches. This toolbox is only intended and safe for use in storing and transporting small tools and equipment and/or other materials.

WARNING

1. If the proper mounting brackets are not used, the toolbox could drop off the vehicle while it is moving and cause personal injury and/or property damage.
2. Mounting your toolbox through the top, back or sides without bottom support will significantly reduce the capacity and possibly the life of the toolbox.
3. Prior to any welding or drilling holes in a vehicle frame, check for location of fuel tanks, fuel lines, brake lines or electrical wires.
4. If welding is to be done on a vehicle frame in the mounting of this toolbox, disconnect the cables from the battery to prevent shorting of electrical components on the vehicle.
5. Always wear protective eyewear when drilling, welding or checking the underside of a vehicle.
