

BATT R/T

Battery Tester & Reset Tool

The CanDo Diagnostic's BATT R/T is a complete solution for testing all 12v & 24v batteries and electrical systems - and it now adds Battery Matching & Reset capabilities!

BATTERY MATCHING AND RESETS:

Today's latest vehicles require a reset of the battery life when replacing batteries. Failure to do so may result in over-charging the new battery leading to shortened battery life and, in some cases, driveability issues. With the Batt R/T, you no longer need a complicated scan tool to perform a battery reset.

FEATURES

- Perform Battery Matching and Resets on: **Porsche, BMW, MINI, VW, Volvo, AUDI, Jaguar, Land Rover, Ford, Toyota, Lexus, Mazda, and SEAT**

- Built-in Manual Procedures
- Portable Design
- Free Updates

BATTERY MATCH V30.65
>Mitsubishi
Nissan/Infiniti
Peugeot
Porsche
Skoda
Seat
Toyota/Lexus

BATTERY TESTING:

The BATT R/T is compatible with a wide variety of battery types, including CCA, SAE, DIN, JIS, IEC, EN and CA. It features quick and easy assessment of battery condition and electrical system performance

FEATURES

- Battery Test on and off the vehicle
- Full electrical system test
- Battery Test – tests the battery's condition
- Grounding Test – Quickly check the engine and chassis ground

- Starter Test – Cranking test to determine cranking power
- Alternator Test – Check the charging conditions of the alternator during electric loading and without electrical loading.

Input standard choice
>CCA
DIN
JIS
EN
IEC
GB
SAE
