

# ULTRA™ CARDONE

## PREMIUM CALIPERS

### The Problem: Rusty Calipers

- Later model castings do not withstand the elements as well as older castings
- Many standard "hot oil" dipped reman calipers have surface rust right out of the box
- Most reman calipers will suffer rust development
- Over 70% of all vehicles released since 2002 have premium wheels that increase caliper visibility

Results after 100-hour humidity test = approximately 1 year of average driving.

### The Solution: ULTRA™ Premium Calipers

- Exclusive weather-proof coating
- Silver finish complements all wheel types
- Banjo bolts included, where applicable
- Mounting brackets & hardware included/installed
