

About This Wash Pad

Grrr! Grab the fluffy Bear Claw Wash Pad and wash your car with grizzly suds! The Chemical Guys Bear Claw Car Wash Pad is tough and mean on dirt and grime, but ultra-soft on paint and shine. Chemical Guys spun the Bear Claw Car Wash Pad from ultra-plush scratch-resistant synthetic wool fur to hold tons of water and suds, and carry away dirt and debris. The thick woolly pad traps dirt and grime deep in the fur and prevents swirls and scratches on car paint. The massive plush pad holds over five-times its weight in soap and water, requiring fewer trips to the bucket for a faster car washing experience. Grab the plush wash pad, dunk it in a bucket of soapy car wash suds, then wipe any dirt and debris from your vehicle without installing any car wash swirls or scratches. The premium synthetic wool is ultra-soft, scratch-resistant, and machine-washable for easy care and maintenance. Pair the Bear Claw Car Wash Pad with any premium Chemical Guys car wash soap for a sudsy scratch-free wash for enhanced shine and glow. Take down the grizzliest dirt and grime with the soft fur of the Bear Claw Car Wash Pad.

Scratch-Resistant Pad

Bargain-bin and auto parts store wash pads are made with cheap materials that scratch paintwork. The Chemical Guys Bear Claw Car Wash Pad is made with thick, plush, super-soft high grade synthetic fur. Low grade pads are poorly made and do not hold a lot of water or soapy suds; the Bear Claw Wash Pad holds five-times its weight in water and suds for plenty of lubrication across any sensitive automotive surface. The thick weave of the synthetic fur lifts and traps abrasive dirt and contamination deep within the plush fibers away from sensitive paintwork. The Bear Claw Car Wash Pad drastically reduces the chances of scratching and swirling paintwork during regular washes. Use the Bear Claw Pad in any two bucket wash, or in conjunction with a foam cannon or foam gun for extra protection against swirls and scratches. Clean, shine, and protect your car as you wash with the Chemical Guys Bear Claw Car Wash Pad.

Ultra-Plush, Ultra-Absorbent

The Bear Claw Car Wash Pad holds tons of soapy suds for a scratch-free wash on any car. Low-grade pads do not absorb high volumes of water, and are not plush enough for scratch-free detailing. Wash mediums like cheap sponges and low-grade pads have nowhere for dirt and debris to go, so they simply push dirt around like rough sandpaper on paintwork. The plush Chemical Guys Bear Claw Car Wash Pad holds tons of soap and water to lift and lubricate dirt and debris, then traps it deep within the soft synthetic fur. Keep washed-off dirt away from paintwork for a scratch-free wash experience time after time. Use the two bucket wash method to rinse embedded dirt and debris from the wash pad before returning to the soap bucket for another pass over the vehicle. Choose the Chemical Guys Bear Claw Car Wash Pad for a scratch-free wash every time.

Durable Build Quality

The Bear Claw Car Wash Pad is made with durable synthetic materials for years of detailing use. Traditional lambswool wash mitts and pads shed fur and fibers all over the car during a wash, cost 3 - 5 times the price of synthetic wash pads, and only last a few washes. The Chemical Guys Bear Claw Car Wash Pad is made with durable synthetic materials that last for years, and stay soft for scratch-free washing and detailing use. The synthetic wool of the Bear Claw Car Wash Pad stays plush and soft, and traps and holds dirt after it lifts and separates it from the surface of the vehicle. Trapping dirt within the pad keeps it from rubbing across the paintwork, and reduces the chances of scratching paint over time. The plush cuffless design is easy to grab and rub across paintwork for gentle cleaning power. Choose the only pad tough enough to claw through dirt, grime with a scratch-free shine: the Chemical Guys Bear Claw Car Wash Pad.

How To Use: Washing The Car

- Use two buckets whenever washing your car: fill one bucket with 5 gallons of water and 1 - 3 oz. of your favorite Chemical Guys car wash soap, and the other bucket with plain water.
- Rinse your car, then wash in straight lines with the soapy wash pad.
- After cleaning a panel or two, dip the pad in the bucket of plain water to loosen the embedded dirt and grime, then wring it out on the ground to purge the dirt from within.
- Return to the soap bucket and continue to wash the whole car.
- Rinse away all soap and dirt from the car, then dry with premium microfiber towels.

Care Instructions

- Machine wash microfiber goods with Chemical Guys Microfiber Wash and HOT water.
- Machine dry microfiber goods on LOW heat.
- Do not use fabric softener or dryer sheets: fabric softeners clog microfiber, rendering it unabsorbent and useless.

Feel the difference with Chemical Guys.
