

About This Towel

The Chemical Guys Waffle Weave Gray Matter Drying Towel quickly wicks up water, glass cleaner, and detail sprays after a wash. Just like pancake syrup into a waffle trap, waffle weave microfiber towels quickly trap and absorb water and liquids after a weekly wash or full detail. Traditional microfiber towels use plush piles to wick up standing water and require intense rubbing and buffing; Gray Matter Waffle Weave Towels soap up and absorb standing water in just one pass or dab over the surface! Use Waffle Weave Gray Matter Drying Towels to soak up wash water and quickly dry any car, truck, motorcycle, or SUV. Waffle Weave Gray Matter Drying Towels are perfect for drying any vehicle because they are extra absorbent and extra soft for sensitive detailing applications. Waffle Weave Gray Matter Drying Towels are made with premium microfiber for softness and durability, and a luxurious silk-banded edge to further reduce the chances of scratching sensitive paintwork. Every towel features a proprietary waffle weave texture that increases surface area, and quickly wicks up water and liquids. The premium microfiber towel is ultra-soft, and helps prevent any swirls or scratches on paintwork, glass, and other sensitive automotive surfaces. Microfiber is the industry-standard cloth for touching and wiping cars because it is super-soft, super-absorbent, and will not scratch paint when used properly. For streak-free glass and paintwork after a wash, pick up the Chemical Guys Waffle Weave Gray Matter Drying Towel.

Premium Large Waffle Weave Drying Towel

The Waffle Weave Gray Matter Drying Towel is an extra-large and absorbent drying towel. While normal microfiber towels use plush strands of microfiber to absorb water and dirt, Gray Matter towels use a special waffle groove pattern to trap and absorb water droplets. Regular towels must sometimes be buffed vigorously over the surface; Gray Matter Microfibers can be dabbed or glided gently once to pick up any standing water. Although regular towels are 16" square, the Waffle Weave Gray Matter Drying Towel is a huge 36" x 25", enough to dry an entire SUV by itself. The towel is blended with premium microfiber and picks up any missed dirt for a scratch-free shine. Cheap microfiber towels have hard nylon edges that scratch paint while buffing and drying. Waffle Weave Gray Matter Drying Towels feature premium silk-banding along all four edges for the softest scratch-free touch from the entire towel. Use the Waffle Weave Gray Matter Drying Towel to soak up water on its own, or pair it up with a drying aid or quick detail spray for enhanced water absorption. Dry any large car, truck, motorcycle, or SUV quickly and without streaks or scratches with the Chemical Guys Waffle Weave Gray Matter Drying Towel.

Exclusive Silk Edge

The Waffle Weave Gray Matter Drying Towel uses unique waffle groove patterns to trap and absorb water, and ultra-soft microfiber with exclusive silk-banded edges to help prevent swirls and scratches on sensitive paintwork. While cheap microfiber towels have hard nylon edges that scratch paint, Chemical Guys Waffle Weave Gray Matter Drying Towels use soft silk edges to protect paint from damage with 100% of the towel's surface. Detailers and weekend warriors routinely spend countless hours of meticulous work to achieve the perfect finish, only to ruin it with the final wipe of their cheap bulk-bought towel. Don't get fooled again: see why detailing professionals, hardcore enthusiasts, and show car gurus choose Chemical Guys Waffle Weave Gray Matter Drying Towels for the end of every detail and routine car wash.

Keep Your Towels Clean And Soft

Clean and soft microfiber is crucial to preventing scratches on paint. Use Chemical Guys [Microfiber Wash](#) to keep your microfiber towels clean, soft, and absorbent! To wash and dry microfiber goods:

- Separate microfiber towels by type into designated wash & dry loads.
 - Keep grimy towels separate from cleaner paint towels!
 - Start by washing "cleaner" towels first, then finish with "grimier" towels.
- Machine wash microfiber goods with Chemical Guys Microfiber Wash and HOT water.
 - Hot water opens the fibers to better release dirt and grease.
 - Do not use fabric softener: fabric softeners clog microfiber and render them unabsorbent and useless.
- Machine dry microfiber goods on LOW heat.
 - High heat cooks fibers, makes them hard, and then they can scratch paint.
 - Do not use fabric softener dryer sheets: fabric softeners clog microfiber and render them unabsorbent and useless.
