

How It Works

Chemical Guys Bare Bones is a premium undercarriage spray dressing specifically formulated to protect and enhance hard-to-reach areas like the wheel wells, subframes, springs, and fender liners. The sprayable formula restores the original shine back to any vehicle's trim and undercarriage. Bare Bones covers undercarriage surfaces to protect and enhance in one easy step. The oil-based dressing restores faded undercarriage and trim surfaces back to like-new condition. Bare Bones is designed using advanced UV solar protection, which enhances and protects undercarriage and trim surfaces from the harmful effects of the sun. The sprayable dressing is not just for undercarriages, Bare Bones also works great on plastic, rubber, vinyl, tires, and bumper covers. The premium dressing repels dirt, dust, and moisture for improved durability. Once Bare Bones is applied, the surface is protected, enhanced, and dry to the touch. Great for giving lifted trucks a perfectly detailed undercarriage. Perfect for achieving the finest details on show winning cars. Bare Bones makes detailing any undercarriage a quick and easy job. Restore the original shine back to any undercarriage with Bare Bones Dark Shine Undercarriage Spray.

The oil-based formula sticks to any surface for improved durability. The sprayable dressing is designed for undercarriages, wheel wells, sub-frames, springs, suspension components, fender liners, and even bumper covers. Bare Bones keeps your undercarriage trim looking great while resisting road grime, dirt, dust, tar, and moisture while driving. Bare Bones uses premium ingredients that finish with a dry-to-the-touch feel within minutes. Now any undercarriage can stay looking great with Chemical Guys Bare Bones.

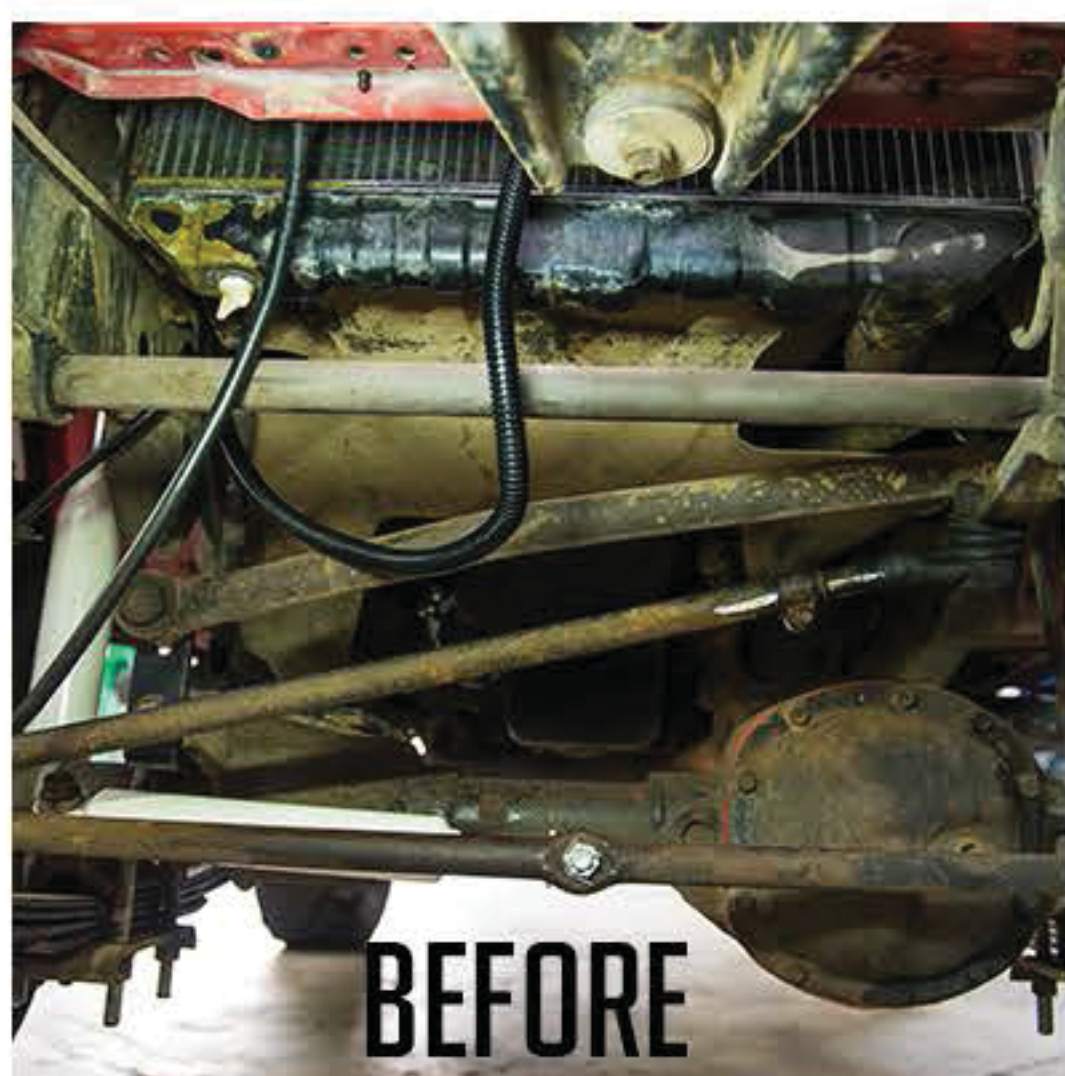

Protect And Enhance

Bare Bones Dark Shine Undercarriage Spray restores the original shine back to any vehicle's undercarriage. The innovative formula brings back the black shine while also adding protection. Over time, a vehicle's undercarriage can become faded and discolored from road grime, dirt, road salt, and UV solar rays. The oil-based formula sticks to any surface for improved durability. The sprayable dressing is designed for undercarriages, wheel wells, subframes, springs, suspension components, fender liners, and bumper covers. Bare Bones keeps your undercarriage trim looking great while resisting road grime, dirt, dust, tar, and moisture while driving. Bare Bones uses premium ingredients that finish with a dry-to-the-touch feel within minutes. Now any undercarriage can stay looking great with Chemical Guys Bare Bones.

Endless Possibilities

Bare Bones Dark Shine Undercarriage Spray opens endless detailing possibilities for any detailer. Simply clean the undercarriage surface using Chemical Guys Orange Degreaser or NONSENSE to remove any dirt and road grime. Once cleaned, apply Bare Bones to any undercarriage surface including wheel wells, fender liners, fuel tanks, subframes, and suspension components. The durable Bare Bones layer seals and protects your vehicle's undercarriage against road salt, dirt, grime, and filth. Bare Bones helps protect against rust on your undercarriage by repelling road salt during winter months. The versatile spray dressing works on any car, truck, off-road vehicle, and RV to enhance the underside of the vehicle. Advanced bonding technology creates a grip on the surface that lasts wash after wash. Bare Bones helps repel water in all seasons. The water-repelling formula works on all plastic, rubber, vinyl, and painted metal surfaces in and around vehicle undercarriages. Bare Bones is the premium undercarriage dressing for any detailer.

High Performance Shine

Bare Bones brings the shine back to any undercarriage. The underside of your car is exposed to harsh road conditions. Dirt, dust, filth, salt, tar, and grime can destroy the underside of any vehicle. UV solar rays fade fender liners turning them from black to grey. Bare Bones Dark Shine Undercarriage Spray works to fix these problems. Bare Bones repels road grime and dirt to keep your undercarriage looking better for longer. Detailing the undercarriage of any show car keeps the judges giving more points. Bare Bones is perfect for detailing any truck or off-road vehicle. The quick spray undercarriage detailer creates the perfect finish on fender liners and truck beds. When the plastic and rubber parts are nourished and restored, the wheel wells turn invisible! Bare Bones finishes with a dry-to-the-touch feel for easily application on virtually any vehicle. Lasts for weeks, not days! Springs, control arms, shock absorbers, drive axles, and differentials can appear black and restored with a coat of Bare Bones. Weather-resistant coating repels road salt to help prevent undercarriage rust. Bare Bones sticks to all undercarriage surfaces including plastic, rubber, vinyl, painted metal, powdercoat, and rubberized undercoating. Protect and enhance your vehicle's undercarriage with Bare Bones Dark Shine Undercarriage Spray.

Bare Bones helps make wheel wells turn invisible! The refined oil-based formula penetrates deep into rubber and plastics to finish with a dry-to-the-touch feel that won't attract extra dirt or grime. Protect and enhance your vehicle's undercarriage with Bare Bones Dark Shine Undercarriage Spray.

Other Sizes Available

Bare Bones Undercarriage Spray is available in [4 ounce](#), [16 ounce](#), and [64 ounce \(1/2 gallon\)](#) sizes.

How To Use:

- Clean dirt and debris from undercarriage parts.
- Spray Bare Bones directly onto the desired surface and allow to dry for 5 minutes.
- Severely neglected parts may require Bare Bones to be worked into the surface with a towel or applicator for best results.
- For desired look, wipe off excess with an old cloth or rag to reduce any extra wet shine.
