

How It Works

One of the fun parts of buying a car is walking around the showroom and kicking the tires on all the brand new cars. It's not just about kicking a rubber tire, it symbolizes an exciting purchase that you seldom get to make. Plus at the end of it all, you get to drive away with a shiny brand new car! The product specialists at Chemical Guys wanted to recreate that kickable bright shine, so they came up with Tire Kicker Extra Shiny Tire Shine Spray. Now as your car ages with thousands of well-traveled miles on the clock, you can enjoy the same bright wet shine on your tires that you kicked in the showroom. Chemical Guys R&D blended premium water-based dressing, extra gloss enhancers, and UV blockers into a slick sprayable formula. Tire Kicker isn't just for rubber tires, try it on textured plastic, rubber, and vinyl parts as well. Mist a light coat of Tire Kicker Tire Shine over faded plastic mirrors, bumper parts, grilles, and grates to restore a deep-black new look. Rub some Tire Kicker into dashboards, door panels, and vinyl seats to enhance a bright wet shine on interior car parts as well. The easy-to-use formula finishes dry to the touch; simply wipe any excess product to avoid dripping, running, and any tire sling all over the sides of the vehicle once you drive away. Now anyone can enjoy the bright wet shine of brand-new cars with Chemical Guys Tire Kicker Extra Shiny Tire Shine Spray.

Fan-Favorite Totally Kickable Shine

Tire Kicker Extra Shiny Tire Shine Spray delivers long lasting wet shine and protection without any greasy mess. Tire Kicker is a sprayable water-based dressing that enhances a deep black shine on plastic, rubber, and vinyl car parts. The gentle formula is safe for use on car exteriors, interiors, and even engine bays. The sprayable liquid dressing restores a fresh new look to plastics and rubber, and protects against the harmful UV rays that cause discoloration, fading, and cracking. The easy-to-use formula spreads evenly with any foam applicator or brush over textured bumper plastic, car tires, windshield cowls, large offroad tires, rubber window moldings, low profile street tires, engine bay components, fender liners, grilles, louvers, and more. The refined gloss enhancers and plastic nourishers penetrate deep into the piece, finish dry to the touch, and do not attract dirt or dust. Chemical Guys R&D blended Tire Kicker for more shine, more gloss, and more durable protection. Work Tire Kicker into any vinyl, plastic, or rubber, then buff off any excess for durable protection and deep black shine on any trim pieces and tires.

Extreme Durability And Protection

What's the use of dressing tires and bumpers if it all washes off a week later? Chemical Guys believes that tires should stay looking wet, shiny, and kickable even after one rainstorm, so product specialists blended the dressing with weatherproof ingredients. Now one application of Tire Kicker Tire Shine keeps tires, bumpers, and trim pieces looking deep black, shiny, and glossy for weeks on end. Normal car washing with Chemical Guys car wash soaps won't destroy the beautiful wet shine of Tire Kicker Extra Shiny Tire Spray. There's nothing worse than finding all your tire shine slung all over the doors and mirrors. When applied correctly to clean tires, Tire Kicker Tire Shine will not sling, run, or drip, and will stay off paintwork and on tires where it belongs. Water splashed up from puddles beads and rolls away from dressed surfaces and parts. Powerful UV blockers actively reject harmful solar rays that fade and discolor any vinyl, plastic, and rubber parts in the first place. Treating tires, trim, and dashboards with Tire Kicker Tire Spray keeps vinyl, plastic, and rubber parts looking newer for longer than leaving them alone. Throw away your dad's tire wet, and see why detailing professionals, hardcore enthusiasts, and weekend warriors all made the switch to Chemical Guys Tire Kicker Extra Shiny High Shine Tire Spray.

High Gloss Shine

Tire Kicker Tire Shine is a premium tire dressing that creates a super wet appearance on all tires. The extra shiny tire wet creates a high gloss shine that last for weeks. Enthusiasts who love a bright wet shine on interior and exterior car parts will love Tire Kicker Extra Shiny Tire Shine Spray. Tire Kicker Tire Shine is formulated for a super wet appearance and extreme durability. Make tires, bumpers, dashboards, door panels, and engine covers, hoses, and wires look brand new and shiny with Tire Kicker Spray Shine. The sprayable tire shine is formulated with advanced UV blockers that prevent rubber tires from fading and cracking. Tire Kicker Tire Shine is weatherproof for a long lasting shine in all seasons. The gentle water-based formula creates a high gloss shine that restores and conditions rubber tires. Tire Kicker Tire Shine instantly bonds to the tire and eliminates sling-off onto body panels. The super glossy finish makes Tire Kicker Tire Shine the perfect choice for any car show winner. Works great on all tires, bumpers, fender liners, and exterior trim. Tire Kicker Tire Shine with repels water and dirt to last through rain storms and car washes. Just one application gives a brilliant shine with durable protection. Give your tires a high gloss shine with Chemical Guys Tire Kicker Extra Shiny Tire Shine Spray.

Need Help Choosing A Dressing? Customize Your Level Of Shine!

Chemical Guys manufactures the perfect dressing and protectant for any desired look. Some car guys want a bright wet shine or tires and bumpers, some want a like-new silky smooth look.
