

How It Works

Hybrid V7 is a revolutionary combination of spray sealant technology and quick detailer that has the capabilities to produce a high gloss shine with optical clarity. Hybrid V7 is designed to remove fingerprints, dust, road grime and debris while providing a high gloss shine teamed with the protection of a sealant. Hybrid V7 is the world's first hybrid detailing spray formulated with rapid bond technology that delivers superior optical clarity with ultimate protection. This amazing hybrid detailing spray will be sure to give you a finish that will impress all the car show judges. Hybrid V7 combines nano-spec engineering with spray sealant technology to produce the highest level of optical clarity. The advanced polymers in Hybrid V7 produce a high gloss transparent shine while providing long lasting UV protection to paint, glass, and virtually any exterior surface. Chemical Guys engineered rapid bond technology that allows Hybrid V7 to bond and disappear into the surface revealing a high gloss finish that professionals and enthusiasts demand. The nano-spec engineering allows this amazing spray sealant to protect any exterior surface, both painted and coated plastics. Hybrid V7 easily removes dust, dirt, debris, fingerprints, and even water spots in seconds while leaving behind a sealant coating that protects your vehicle from harmful UV rays.

Easy Application

The spray capabilities of Hybrid V7 gives you the easiest application with a protective barrier which keeps your car looking amazing and fights off the elements of daily driving. Chemical Guys spent over five years developing optical grade detailing solutions for the aerospace industry to provide cleaning capabilities and protection to airplanes and jets in the harshest environments. Optical grade detailing technology provides ultimate clarity to any painted surface exposing the true essence of beauty that lives inside your paintwork. The transparent high gloss polymers bring life to any color paintwork. Hybrid V7 even works excellent on metallic finishes to make your paintwork sparkle in the sun. Hybrid V7 is the world's first quick detailer and spray sealant hybrid designed to make detailing faster and easier than ever. Once you try Hybrid V7 Optical Select High Gloss Spray Sealant, you will be convinced it's the most revolutionary detailing spray in the world.

Transparent UV Protective Polymers

Hybrid V7 is designed to protect your car from the harshest elements. Utilizing transparent protective polymers, Hybrid V7 bonds to virtually any surface to create a layer of shine and protection. We developed the transparent polymers to enhance the finish while protecting your vehicle in one easy step. This technologically advanced layer of protection enhances any color finish and even brings life to metallic paintwork. Often times, many traditional waxes can mute metallic finishes holding back the true sparkle and beauty of the paintwork. Hybrid V7 creates a bright finish that is sure to impress any car enthusiast or car care professional. The finish created by this amazing product is bright, crisp, and astonishingly smooth. We designed Hybrid V7 to be the fastest and easiest detailing spray sealant on the market. Simply apply a few sprays to a quality microfiber towel and in minutes your car, truck, motorcycle, boat or RV will look stunning. The transparent polymers enhance and magnify the beauty of your paintwork to produce the highest level of perfection.

Optical Grade Clarity

Chemical Guys spent over 5 years developing optical grade detailing technology to allow maximum shine on any surface. Hybrid V7 is designed to bring out the true beauty of your paintwork by utilizing transparent polymers for a high gloss shine that professionals demand. The transparent polymers use Chemical Guy's patented rapid bond technology to blend into the surface for protection on the nano-spec level. Hybrid V7 removes fingerprints, dirt, dust, and contamination while leaving behind a protective sealant barrier that protects against rain, road debris and water spots. We wanted to design a product that literally disappears into the paintwork creating a smooth surface with a high gloss finish that can only be described as stunning. Our patented optical grade detailing technology is designed to reflect the light source in the purest form for extreme shine. Application has never been easier. Just a few sprays of Hybrid V7 on a microfiber towel and your vehicle can be free of dirt and dust while protected from the elements.

Ultimate Versatility

Hybrid V7 is the world's most versatile detailing product. Hybrid V7 protects virtually any exterior surface while adding a high gloss shine. Paintwork can be cleaned and protected in one easy step. The best part is that it also works on glass and plastic as well. Even textured plastic can be restored back to the original OEM appearance. Glass is often one of the most challenging parts of a vehicle to detail. Hybrid V7 allows you to clean and protect your glass against sun staining and water spots. Now your glass can finally be perfect! Virtually every exterior part of your vehicle can be detailed with Hybrid V7. Paintwork, plastics, exhausts, wheels, glass, and headlights can all be cleaned and protected using this advanced product. Hybrid V7 will change the way you detail your car, truck, boat, RV or motorcycle forever.

Other Sizes Available

Hybrid V7 is available in [4 ounce](#), [16 ounce](#), and [1 gallon](#) sizes.

How To Use:

- Make sure the surface is cool to the touch before applying.
- Mist Hybrid V7 over the surface, then wipe up any dirt and debris in one direction with a microfiber towel.
- Flip to a clean side or use a clean microfiber towel to gently buff the area dry.
- Use Hybrid V7 after every wash to ensure a perfect finish with long lasting protection.
- Use Hybrid V7 between washes to remove dust, bird droppings, and water spots.
- Do not use in direct sunlight.
