2017 CATALOG

Custom Autosound Since 1977

Thank you for your continued support and business! Custom Autosound, the originator (1977) of classic vehicle audio is growing with a staff of over 30 and more than 1500 great dealers. We are eternally grateful for your loyal support.

We are proud to introduce our new Slidebar line. These new radios are specifically designed to look like an original radio but with a flip of the slidebar, the analog display drops away to reveal the full featured digital display with 7 LCD color choices. See the facing page for more details.

"The System" solves the age old problem of where to put speakers in classics, customs and streetrods. "The System" allows you to keep the integrity of your vehicle intact yet enjoy quality sound like many of us have in our new cars.

Our main offering, the USA series radios are designed and engineered specifically for classics and streetrods. Our radios come ready to install with no assembly required. All radios are modified, 'kitted' and tested in the USA.

All USA series radios feature electronic volume and tuning control which greatly increase the reliability and functionality of the units. For icing we upped the power on all of our units (up to 300 watts) to give your customers the power they want. Since iPods, MP3 players and satellite radio have taken off in the last few years we now offer auxiliary input on our radios. Our USA-630, USA-740 and Secret audio models even have a built in USB port for flash drive playback and an iPod doc / controller. With an alpha numeric display for song titles and artist name on music files and iPod.

Our CD Controller radios will operate all functions of the optional CD1 single disc player or BLUKIT (Bluetooth interface) from the buttons on the face of the radio.

NEW SLIDEBAR RADIOS

SLIDEBAR Radio - Analog Look with Modern Features

1964-1/2-'66 Mustang #CAM-MS-SBR

Optional
Bluetooth

AM/FM RDS - iPod doc / CD Controller - USB Flash Drive Player with Hidden Digital Display

The Slidebar Radio is Custom Autosound's latest innovation in the quest for a perfect classic car radio. Just slide the 'slidebar' to the right and the analog AM radio display drops away to reveal a full featured digital display. With the large OEM style push-buttons you get a perfect look in a classic dash. Now a radio that not only looks right and sounds great in your classic vehicle, it gives you a direct connection to today's modern audio. Although it looks classic it has the latest modern features that include an iPod doc. Navigation for the iPod includes artist/song/album/playlist all from the buttons on the radio. A great feature so you can keep the iPod hidden away in your glove box or console. The USB input allows you to plug in a USB flash drive for playback of MP3/WMA song files. The alpha numeric LCD display shows the song/artist/album titles during playback of flash drive (thumb drive), iPod files and RDS radio station information. This LCD display has 7 user selectable color choices so you can match it to your other dash illumination. As an option you can get Bluetooth music streaming from your Bluetooth capable phone or Bluetooth compatible player with the BLUKIT. A2DP music streaming allows you to advance the songs on your phone by using the track up/down button on the radio. It will also mute the music while taking a hands free phone call through the radio. With 300 watts peak the radio should have all the power you may need, if you want more, there are four pre-outs jacks and a subwoofer out for optional amplifiers. For even more versatility the radio has auxiliary audio input for satellite radio or any portable player you may wish to use. If CD's are your thing we have you covered as this radio will control an optional CD1 compact size CD/DVD mp3 compatible player.

THE ALL-NEW RADIO FROM CUSTOM AUTOSOUND

USA-740

The USA-740 offers the same classic look that Custom Autosound has been known for with today's latest features. Now, you can stream music from your Bluetooth compatible device or talk hands free on your Bluetooth phone. A handy microphone is included. A solid 300-watt peak power should be all the juice you need, yet the USA-740 has Hi 4volt, 4channel RCA Pre-outs and a subwoofer RCA pre-out for additional amplifiers. The USB input allows you to plug in a USB flash drive for playback of MP3/WMA/FLAC/WAV song files.

A front mini jack auxiliary audio input and a rear RCA auxiliary audio input provide versatility for additional options like satellite radio, I-pod or any portable player you wish to use. Match the dominant color of your instrument cluster with user selectable multiple LCD color choices with LCD dimmer control. The AM/FM RDS tuner shows station, song and artist on LCD display. For those committed to music collections on CD's, the USA-740 fully controls our optional CD-1 compact disc player. Classic style with today's sound and performance taking every road and curve with you in your vintage vehicle.

FEATURES:

- AM/FM RDS Tuner with 25 pre-sets (15FM/10AM)
- RDS Tuner shows station / song / artist on LCD Display
- Two Aux-inputs: Mini Jack front, RCA Rear
- Alpha Numeric Display for MP3/WMA/FLAC/WAV
- Electronic Tuning & Volume Control, Last Number Memory
- Clock or Function Display (switchable)
- Bluetooth and Remote Microphone Included
- USB Port for Flash Drive MP3/WMA/FLAC/WAV/Playback
- Direct CD-1 Control
- LCD Dimmer Control
- 300 Watts Peak 2-Ohm stable
- 7 LCD color choices
- LCD Dimmer Control
- Digital Clock
- DSP EQ
- Power Antenna Lead

◆ = Diamonds Indicates Radio Special Order Surcharge.

• Black dots indicate radio models available.

All radios are 12 volt negative ground (converters are available).

Stock dash bezel shown in photos are not included with radios.

Specifications subject to change without notice.

If your vehicle is not shown on application guide please inquire.

SPEAKERS

KICKPANEL SPEAKERS

You can now enhance sound quality with Custom Autosounds new kickpanel speaker assemblies! These new kicks sound great, enhance interior appearance and affords a "no modification" fit. Most models feature 6½" coaxial (2-way) speakers with 100 watt power handling capacity (Some GM models have 4" or 4"x6" 60 watt speakers). Also available with Pioneer speakers. Kickpanels come in black ABS plastic and are sold with or without speakers (except Chevelle/Nova/Camaro NO/AC models sold with speakers only).

UNDERCOVER SPEAKERS

UNDERCOVER I Speaker Enclosures

Custom Autosound designed and manufactured these speakers specifically for 'under seat' or horizontal 'wall' installations. 'Could be used on large 'parcel shelves' - wherever! Compact unit with one 5½" woofer and Piezo tweeter in each enclosure.

Under seat fit for most pre '78 cars and trucks. 120 watt capacity! If you've got the space we have the solution! Each enclosure measures 3"(H)x 8-1/4"(W)x 11-1/4"(D)

Sold in pairs

Undercover1

UNDERCOVER II Upgrade Speaker Enclosures

Want a little more from your hidden speaker system? This is it! We have developed the UNDERCOVERII with an 8" woofer and 2 Piezo tweeters in each box. This system can be mounted in many

of the same locations as the regular UNDERCOVER. With the 8" woofer in UNDERCOVERII you get a much fuller deeper sound. These are a great addition to our USA series radios with their 200 watt capacity. Sold in pairs. Measure 11"(W) x 12.5"(D) x 3"(H)

UndercoverII

SYSTEM 1

System 1 solves the age old problem of where to put speakers in classics, customs and street rods. System 1 allows you to keep the integrity of your vehicle intact yet enjoy quality sound like many of us have in our new car. Satellite speakers look like AC vents and can be mounted just about anywhere. The woofer is optimally mounted under the seat or even in the trunk.

Amplified

Flat active aluminum subwoofer enclosure with 3-channel amplifier. Two 3" mid-tweeter satellite speakers in die cast metal housings and 8" woofer. Wired remote for bass level. Amplifier installation kit included. Amplifier power: 150 watt subwoofer / 2x50 watt mid / tweeter.

Dimensions:
Amp / Sub 2.8" x 13.5" x 9.8"
Satellite 3.2" x 3.75"

BLUETOOTH / SPEAKERS

BLUETOOTH

Bluetooth interface for Custom Autosound CD controller radios (USA-630, USA-66, Slidebar and Secretaudio manufactured after 4/03 - units designed for CAM CD changer).

Connects to: 8-PIN DIN at Headunit.

This adapter plugs into the CD changer port of your radio and gives you the ability to do hands free calling from your Bluetooth capable phone / listen to music stored on your A2DP enabled Bluetooth device. If you have a CD player attached to your radio it will still work with the adapter plugged in.

Model# **BLUKIT**

SPEAKERS

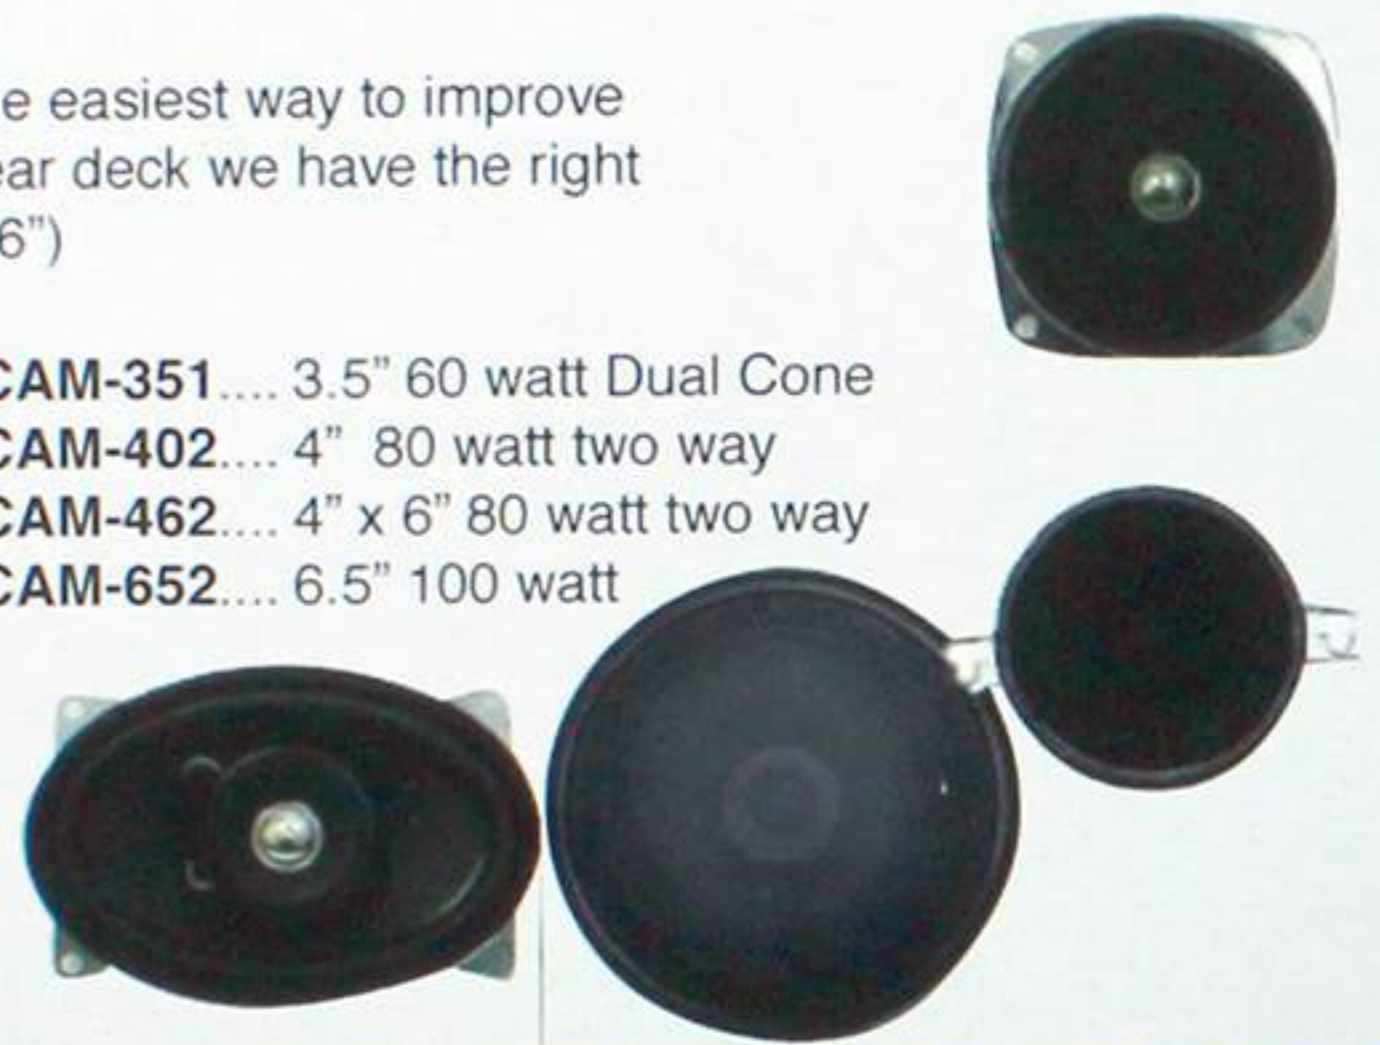

Replacing original speaker with Custom Autosound stereo speakers is the easiest way to improve overall sound quality. Whether they're in the dash, kickpanels, doors or rear deck we have the right size for you. Includes grills, wire and hardware. (no grills on 3-1/2" and 4"x6")

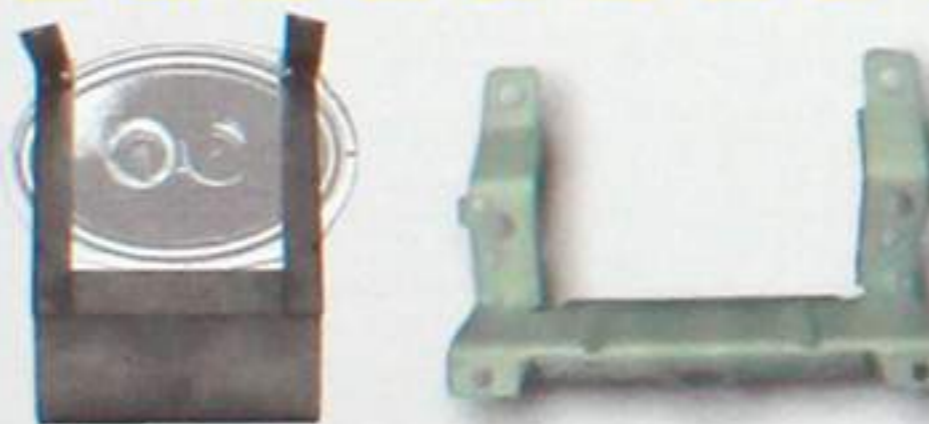

These 3-way 6"x9" speakers are rated at 200 watts and come with our exclusive flat metal grill with black finish. They can easily be painted to match your interior or left as is. Full Chrome Speaker Basket;

63mm Ferrite Tweeter & 36mm Neodymium Tweeter, 4 ohm; 16 oz. Magnet, 67Hz - 20 kHz frequency response; Sensitivity 93db # **CAM-693C**

- CAM-351**.... 3.5" 60 watt Dual Cone
- CAM-402**.... 4" 80 watt two way
- CAM-462**.... 4" x 6" 80 watt two way
- CAM-652**.... 6.5" 100 watt

If your **1955-'56 Chevy Belair** doesn't have the original bracket for the dash speaker this unit will enable you to install a new speaker. Speaker not included. Part# **BRACE**

1969-'70 Mustang and Cougar radios support bracket. This bracket is crucial in mounting the radio as the radio is held by this bracket and not the dash. Our tech department has received numerous calls from frustrated installers trying to install a radio in a '69 or '70 Mustang or Cougar without this bracket. Part# **MS BRACKET**

DVC SPEAKERS

Our new dual voice coil (DVC) speakers will give you the best quality sound possible from your original mono speaker location. These speakers have up to 70% more cone area than the conventional dual speaker setup giving you improved bass response and 140 watt power handling. Both stereo channels connect directly to one speaker. This is the best sound solution for the original speaker location we have found. Available in 6"x9", 5"x7", 4"x10" and 5" (perfect fit for VW dash speaker)

DUAL SPEAKERS

Our dual dash speakers provide stereo sound from factory mono speaker locations. We offer 38 different configurations available for most classic cars and trucks. The 1000 series speakers replace 'OEM' speakers that are held in place by screws. The 2000 series speakers replace 'OEM' speakers that are held in place by a metal bracket. These assemblies are pre-wired to 'plug in' instantly to our radios. Choose from Custom Autosound speakers or try our Kenwood speaker upgrades.

Please see application chart for your vehicle.

2000 Series Speakers (bracketed)

ACCESSORIES

HIDEAWAY ANTENNA

AMPLIFIED ELECTRONIC AM/FM ANTENNA (ACTIVE MAGNETIC TYPE)

Designed for optimum AM/FM reception. Excellent solution for Streetrods, Show Cars, Classics or any vehicle where a conventional antenna is not desirable.

Multiple mounting options

No Drilling or Grounding required (radio must be grounded properly)

Requires 12-volt power

104" Power and Antenna Cable

#ANTUV-HIDE AWAY

Also Available: Fender Mount Power Antennas

Fully Automatic Standard Power Antenna #ANTUV-F

Fully Automatic Stubby Power Antenna #ANTUV-STUBBY

POWER CONVERSION

Voltage Booster

Operates 12 volt negative ground accessories from 6 or 8 volt negative ground electrical systems. The maximum output power is a function of input voltage. When used in a 6 volt system, it can continuously supply more than 3-1/2 amps with the engine off, and about 5 amps with the engine running at a fast idle. Because of its very efficient design, its current draw is negligible when no load is applied (10 milliamps).

NOT RECOMMENDED FOR: Power actuated door locks, trunk release solenoid, air conditioner clutches, fans, blowers, power windows, or other electromechanical devices.

#NGVB-HC

Power Inverter

Operates 12 volt negative ground accessories from 6, 8 or 12 volt positive ground electrical systems. When used in a 6 volt positive ground system, it can continuously supply more than 2.1 amps with the engine off, and about 2.5 amps with the engine running at a fast idle. In a 12 volt positive ground system it can supply 4.0 amps (min) and 4.7 amps (max) continuous duty. The PGPI-HC uses a common ground so isolation is not necessary, and because of its efficient design, its current draw is negligible when no load is applied (10 milliamps). NOT RECOMMENDED FOR: Power actuated door locks, trunk release solenoid, air conditioner clutches, fans, blowers, power windows, or other electromechanical devices. #PGPI-HC

Memory Maintenance Module - For use with NGVB-HC and PGPI-HC. For radios requiring a separate, always "hot" input for memory or clock functions. Part# MEMMOD

NOISE FILTER

If after installing a new stereo system you experience unwanted motor whine or engine noise, check all grounds on radio, amp, antenna, etc. If you still have noise, our filter may help!

#NONOISE

PROMOTIONAL

Custom Autosound offers working or non-working displays. Both can be configured with radios of your choice. Displays can be fitted with one, two or three radios. Working models include speakers, power supply, antenna, etc.

Radio Display Dimensions 16" wide x 16" Deep x 26.5" High
