# ABOUT DEFENDERWORX

Established in 2001, DefenderWorx began our venture as a premium billet accessory manufacturer for the automotive aftermarket. The business began with billet products for the Hummer H2 and have expanded manufacturing into various makes and models of vehicles.

Today, DefenderWorx has expanded our manufacturing products for the Camaro, Mustang, Ford F-150, Raptor, Corvette, Tundra and more. We continue to update our catalog with premium products for the industry's top vehicles. Our CNC machines allow for custom projects and private label projects, and not just in the automotive market.

For easy accessibility to your truck bed or roof rack try a hitch step. Steps hold up to 250 lbs. and easily installs into the hitch receiver. When not in use as a step it doubles as a logo hitch cover. We offer a variety of officially licensed brands to suit your truck or SUV.

All products are officially licensed.

Crafted from premium billet aluminum.

Fits all standard 2" receivers.

**MORE PRODUCTS COMING SOON!**

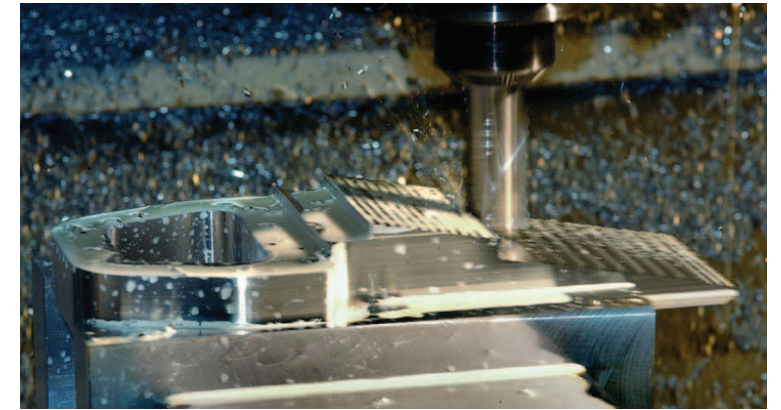

# OUR LICENSEES MAKE US BETTER

We work directly with some of industry's top automobile brands. The DefenderWorx line is proud to make licensed products for GM, Ford, Hasbro (Transformers™) and Mopar. With rights to use many trademarks from these licensees, DefenderWorx is sure to have custom products for your vehicle(s).

DefenderWorx Inc. manufactures only the highest quality billet products and offers one of a kind parts for your favorite vehicles.

**Thank you for your business.** Our products are proudly made in Southern California at our Anaheim facility. We only use the best materials to ensure the best quality products for all your vehicles.

## SALT-SPRAY TEST

DefenderWorx is dedicated to ensure that the chrome plating on its parts are the highest quality and have the most durable finish available. We have aligned ourselves with chrome plating businesses to be GM validated and consistently pass the stringent GM 4374M 44 hour CASS test.

Salt is a very effective weapon against snow on the street, but it will eat through any chrome and into the billet aluminum. When salt mixes with water from the melted snow, it slops into the standard micro cracks of chrome and expands when it refreezes, which prys open the chrome and damages the product's finish.

To avoid such damage, apply a coat of sealer wax to your new accessories, and reapply per the wax manufacturer's suggestion. If you live on a road salted area or near the ocean, apply a coat of wax every time you wash your car to provide extra protection from the damaging effects of salt. Over waxing is better than neglecting your chrome.

After direct exposure to salt it is recommended that the chrome be cleaned and re-waxed as soon as possible. While we strive for the highest quality, we need your help to maintain the finish of our parts. Chrome accessories require a little more care but to enjoy your vehicle's striking appearance for years to come the extra effort will be well worth it!
