

Ford F-150/Raptor LED Pod Ditch Light Kit

Thank you for your purchase of our new LED Pod Ditch Light Kit. CAD-designed to use existing mounting points, this kit is compatible with the 2015+ Ford F-150 and 2017+ Ford Raptor. Basic installation instructions are included below.

1. Mark the location of the hood hinges with tape and tape the edges of the hood to prevent scratching.

2. Loosen the two 13mm flange nuts as necessary to fit the bracket (removing the nuts completely is not required).

3. Place the ditch light bracket under the hinge and align the holes with the hood hinge. Adjust the bracket to leave a slight gap at the back of the hood before tightening.

See back for further instructions.

4. Secure the bracket and hood hinge using the factory nuts, ensuring the hood hinge lines up with the tape.

5. Remove the tape and repeat the steps on the other side to complete the installation.

6. Once the bracket is mounted to the hood, refer to the Universal Bracket Info/Mounting Guide, to mount your pod onto the bracket.

Use the small cutouts on the bracket and included zip-ties to secure your wiring harness away from the hood hinge.

NOTE: Do not use automatic car washes with this kit installed.

This installation guide is for the following SKUs:

DD6566 15-20 F-150/Raptor Ditch Light Brackets
