

DR_x Beasley's™

Your Detailing Prescription

1. It is recommended to begin with a freshly washed exterior surface.
 2. Shake Clay Spray well.
 3. Spray a light, even mist onto a two-foot square area.
 4. Gently rub the Clay Bar back and forth, until it glides freely over the surface.
 5. Add more Clay Spray if needed.
 6. Wipe off residue and move on to the next section.
- * Do not apply in direct sunlight or to a hot surface.*
For maximum results, be sure to wash your vehicle before claying in order to remove larger debris.
- Before applying, test a small amount in an inconspicuous place to check compatibility with surface.**
