

DR_x Beasley's™

Your Detailing Prescription

Application Instructions

1. Apply Ebony Polish to a buffing pad and use with a random orbital machine buffer on desired paint surface.
2. After product dries to a haze, remove with a soft, clean microfiber cloth.

Additional Tips

For best results, be sure that car is thoroughly washed, dried, and clayed before use.

Ebony Polish can be used in conjunction with any of our compounds and polishes or as a standalone product. Follow with Dr. Beasley's **Formula 1201** or **PlasmaCoat**. Before applying, test a small amount in an inconspicuous place to check compatibility with surface.
