Wired & Wireless CarPlay Operation

Wired connection

1. Connect an Apple CarPlay compatible device to this unit via USB.
2. Press the Apple CarPlay icon.

The Apple CarPlay home screen appears.

Wireless connection

Before using Apple CarPlay wirelessly, turn on the Bluetooth/Wifi function on the Phone.

1. Press icon on the main menu.
 2. Press to confirm to use wireless CarPlay.
 3. Press icon to search phone device. The available devices appear on the list.
 4. Find the desired device on the screen and press "Pair".
 5. A pass key will be displayed on the screen.
 6. The same key appears on the iPhone, press "Pair" and then press "Allow" for the popups.
 7. Press on the screen to confirm to connect.
 8. Press "Use CarPlay" on the iPhone. The unit configures the connection then starts the application.
- Tip:** Press icon. Displays CarPlay device list. This icon appears Only When CarPlay is connected and two or more devices can be used as CarPlay Source.

Wired & Wireless Android Auto™ Operation

Wired connection

1. Connect an Android Auto™ compatible device to this unit via USB.
2. Press the Android Auto icon.

The Android Auto home screen appears.

Wireless connection

Before using Android Auto wirelessly, turn on the Bluetooth/Wifi function on the Android device.

1. Press icon on the main menu.
 2. Press to confirm to use wireless Android Auto.
 3. Press icon to search phone device. The available devices appear on the list.
 4. Find the desired device on the screen and press "Pair".
 5. A pass key will be displayed on the screen.
 6. The same key appears on the Android device, press "Pair" and then press "Allow" for the popups.
 7. Press on the screen to confirm to connect.
- The unit configures the connection then starts the application.
- Tip:** Press icon. Displays Android Auto device list. This icon appears Only When Android Auto is connected and two or more devices can be used as Android Auto Source.

Bluetooth Operation

Before using Bluetooth

Before you can use a Bluetooth device to make hands-free calls or stream audio, it must be authenticated. This is also referred to as "pairing" a device.

Pairing a New Device

The unit broadcasts the pairing signal constantly when no devices are currently connected. Complete the pairing sequence from your Bluetooth device. Refer to the owner's manual for your device for more details. The device name is "DCPA701W". The unit can be in any mode of operation when pairing is performed. On certain phones, pairing may need to be done more than once.

Connect

The head unit will automatically connect to the last connected device when the connect feature is set to Auto connect On. If the connect feature is set to Auto Connect Off, the head unit will not automatically connect to any device.

Bluetooth Phone

From the main menu, touch the Bluetooth on the screen. Bluetooth icon will appear anytime a Bluetooth device is connected.

Dialing a Number

Press to display keypad and dial a number.

Making and Ending a Call

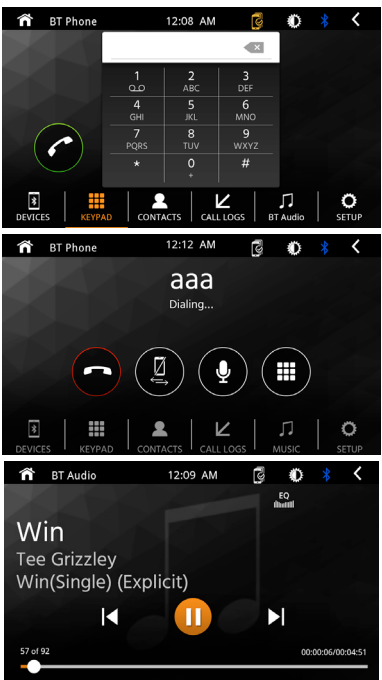

Press to connect a call, and press to end a call.

Transferring Audio

Press to transfer audio between the head unit and mobile phone.

Streaming Audio

- Press to play or pause the music.
- Press to skip to the previous track.
- Press to advance to the next track.

FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 (1) this device may not cause harmful interference, and
 (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 • Reorient or relocate the receiving antenna.
 • Increase the separation between the equipment and receiver.
 • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 • Consult the dealer or an experienced radio/TV technician for help.
