EC7004-SK 7.0" LCD Color Reversing Sensor System

ECCO camera / sensor systems take driver warning to the next level, integrating an ultrasonic obstacle detection system that adds passive protection in addition to warning lights, back-up alarms and standard camera systems. While standard systems only alert danger if the driver is using the monitor, an integrated sensor system will alert the driver audibly and visually before a collision is imminent, immediately directing attention to the camera system monitor and danger zone at the rear of the vehicle.
