

ENEOS Fully Synthetic Motor Oil

ENEOS Motor oil products are blended with a high VI base oil and a specially formulated nano-technology additive system to deliver ultimate fuel saving performance, engine protection and durability – even under severe temperatures and loads.

Product	Part No.	Size	Remarks
ENEOS 0W-20	3230-300	Qt.	For factory recommended viscosities of 5W-20 and 0W-20
	3230-320	5 Qt.	
	3230-400	6 Gal.	6 Gallon Container
	3230-110	55 Gal.	55 Gallon Drum Container
ENEOS 5W-20	3241-300	Qt.	For improved starting and superior engine protection
	3241-320	5 Qt.	
	3241-400	6 Gal.	6 Gallon Container
	3241-110	55 Gal.	55 Gallon Drum Container
ENEOS 5W-30	3261-300	Qt.	Minimizes oil consumption as compared to conventional 5W-30 products; meets API SN/RC standard
	3261-320	5 Qt.	
	3261-400	6 Gal.	
	3261-110	55 Gal.	
ENEOS 5W-40	3281-300	Qt.	For European autos
	3281-320	5 Qt.	
	3281-110	55 Gal.	55 Gallon Drum Container

ENEOS SUSTINA High Performance Motor Oil

With our unique ZP additive technology and W base oil blend, ENEOS SUSTINA provides ultimate fuel economy and engine protection. This ultra-performance oil is ideal for sports cars with large displacements and high output engines.

Product	Part No.	Size	Remarks
SUSTINA 0W-20	3220-300	Qt.	Best suited for LEV and Hybrids
SUSTINA 0W-50	3210-300	Qt.	Upgrade from factory recommendation
SUSTINA 5W-30	3200-300	Qt.	Ultimate performance and protection for high powered engines

Note to Users: The information contained in this reference guide is provided as a general usage guide, based on the most current information available. You should always consult your vehicle owner's manual or check with the manufacturer to verify the proper fluid recommendation for your vehicle.

ENEOS ECO-ATF

ENEOS ECO-ATF Fluid utilizes a unique technology which improves fuel economy in automatic transmissions. It reduces energy loss from oil churning in the torque converter and reduces drag resistance in the shift clutch, without compromising fatigue prevention or anti-wear performance. ENEOS ECO-ATF contains premium base stocks and a low molecular weight VI improver. The base oil provides improved oxidative and thermal stability. The additive chemistry provides high resistance to mechanical shear and fatigue.

ENEOS ECO-ATF Benefits:

- Up to 2% fuel savings improvement based on fuel consumption test results conducted at SWRI (Southwest Research Institute)
- Outstanding friction characteristics provide the driver with a smooth and comfortable ride

Part No.	Size
3103-300	Qt.
3103-400	6 Gal. Container
3103-110	55 Gal. Drum

ENEOS ATF Type SP

ENEOS ATF Type SP is an automatic transmission fluid specifically developed to meet the requirements for the ATF SP-III specification. This fluid also meets the requirements for ATF SP-II and SP-II M. ATF SP-III type fluid is the most common ATF used in Hyundai, Kia and Mitsubishi transmissions.

ENEOS ATF Type SP exceeds the service fill requirements of Hyundai, Kia, Mitsubishi and other OE manufacturers, where a SP-III type transmission fluid is specified. ENEOS ATF Type SP is to be used in vehicles where SP-III ATF is recommended by the manufacturer.

Part No.	Size
3110-300	Qt.
3110-400	6 Gal. Container

ENEOS CVT Fluid

Continuously Variable Transmissions (CVTs) use a metal belt and pulleys in place of the torque converters used in conventional automatic transmissions. It is the friction between the belt and pulleys that transfers the power.

ENEOS (green) CVT Fluid is made from a well-balanced blend of premium additives. The fluid provides maximum protection at the metal-to-metal contact points on the belt and pulleys, delivering long life and superior power transfer.

Typically, as anti-shudder performance improves, there is a reduction in torque transfer capacity. ENEOS CVT Fluid contains new additive technology which provides a high level of torque transfer and anti-shudder.

Part No.	Size
3084-300	Qt.
3084-400	6 Gal. Container
3084-110	55 Gal. Drum

ENEOS Gear Oil

ENEOS Gear Oil is a high performance lubricant for use with manual transmissions and non-limited slip differentials. It utilizes a unique sulphur-phosphorus additive technology to assure excellent protection for the gears against metal-to-metal contact under the most severe conditions, including shock-loads. ENEOS Gear Oil is recommended for use in bevel, spiral bevel and hypoid gear type differentials and in power dividers compatible with synchromesh. ENEOS Gear Oil ensures easy and smooth shifting, even at very low temperatures.
