

Sway Bar and Track Bar grease instructions

Due to the many different styles of stabilizer bars(anti-swaybars), your vehicle could have any combination of endlinks and frame (pivot) mountings. Grease your style as pictured below.

Note: Track bars are similar to double eye drop links. Grease your track bar kit as explained for the double eye drop link.

Remember: Remove the old scale and rust build up on the stabilizer bar. Remove the old scale and rust in the drop links and track bar eyes.

(Energy Suspension's "Hyperflex"™ bushings for drop links could be one piece or two piece depending on application)
