# THE ULTIMATE PERFORMANCE EXHAUST SYSTEM

## Single Side

For the enthusiast who wants the most from their vehicle. Engineered and dyno-tested to give you improved acceleration, maximum hill climbing, towing and passing power. This is our best performing exhaust system which produces maximum torque and horsepower gains at low-end (1800 to 3000 RPMs) with a deep aggressive exhaust tone. System exits behind the rear tire near the stock location. Quieter in the cab than any other performance exhaust. Fuel economy may improve as your engine becomes more fuel-efficient. Ideal system for towing and heavy duty enough for off-road use. Typical dyno-tested horsepower gains average 15-20 increase.

Designed for the race enthusiast to give you the deep powerful race truck rumble tone with impressive acceleration and increased horsepower gains. Exits in front of the rear tires with T-304 polished sport truck tips. Typical dyno tested horsepower gains average 10-15 and 15-20 ft-lb of increased torque. Fuel economy may improve as your engine becomes more fuel efficient. Not recommended for heavy duty towing. Noise level may exceed 95-decibel standard.

## Super Truck

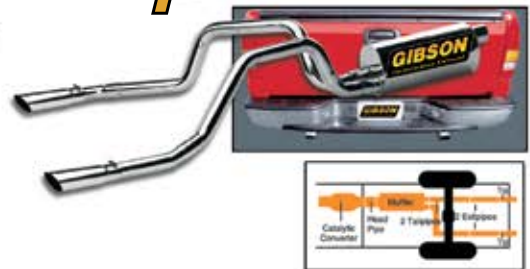

## Dual Sport

If you're looking for that awesome street truck look and want to keep the exhaust from affecting your tow vehicle, this dual cat-back exhaust is for you. Designed for hassle free, bolt-on installation with professional looking results while providing a powerful authoritative deep exhaust tone. Dyno tested to assure 10-15 increased horsepower and 15-20lb-ft. of torque with no annoying noise inside the cab. This system exits behind the rear tire near stock location. Fuel economy may improve as your engine becomes more fuel efficient.

For the enthusiast who wants an awesome look and aggressive throaty exhaust tone, this split rear bolt-on cat-back exhaust is for you. Gibson's exhaust systems decrease backpressure, and produce more torque and increase horsepower. Typical horsepower gains average 15-20 increase. This system exits straight out the back. On some vehicles the spare tire may need to be relocated or removed. Works with most bumpers, roll pan and trailer hitches. Not recommended for towing, because carbon monoxide may be drawn into the interior rear of a vehicle when an exhaust pipe directly exits to the rear of the vehicle. Exhaust sound is louder under towing conditions.

## Split Rear

## Dual Extreme

For the extremist who wants to take their truck to the next level, this dual bolt-on cat-back exhaust is for you. The system exits behind the rear tires at an aggressive angle with a powerful exhaust tone. Dyno tested to give you improved acceleration and maximum passing & towing power. Typical dyno-tested horsepower gains average 15-20 increase.

# MWA OVAL MUFFLERS

**Gibson Performance introduces the M.W.A Muffler Series for Maximum Sound and the Best Muffler Flow PERIOD! This unique patent pending Straight-thru design promotes exhaust gases to flow at the highest rates flowing only 3cfm less than a 3" straight pipe, improving power potential while keeping interior drone to a minimum. The MWA has NO internal packing or weak baffles, allowing it to maintain a lightweight design with a unique and powerful sound. The MWA is 100% Made in the USA and is constructed of high quality Stainless Steel to outlast the competition. When it's time to make your Hot Rod, Car, Off-Road toy, Truck or SUV sound and perform as good as it looks, there is no other choice than Gibson's Muffler With Attitude**

# SFT UNIVERSAL ROUND MUFFLERS

## High Performance Superflow Muffler Suspended Flow Technology

Gibson Superflow Mufflers exceed the performance advantages provided by all other mufflers on the market. They are the industry's most cost-effective, reliable, and trouble-free performance muffler you can purchase. Why settle for noise when you can have MORE POWER and TORQUE with Gibson Superflow Mufflers. Gibson delivers the powerful "big block" sound at the tailpipe with more usable power and torque! The Gibson difference is that our mufflers are quieter inside the cab than any other aftermarket mufflers.
