

# db Armor™

Heatshield Products db Armor™ is a superior sound deadener that raises the bar in the industry. It is thinner and lighter than comparative products and delivers triple the sound-deadening performance! Addressing one of the biggest compromises that car builders face when adding sound deadener, db Armor™ is 20 percent lighter than comparable sound-deadening products. Heatshield Products has accomplished the weight reduction while improving sound-deadening capability, delivering three times the sound-deadening performance of similar products. The db Armor™ is even one and a half times more effective than the highest-rated sound-deadening products on the market!

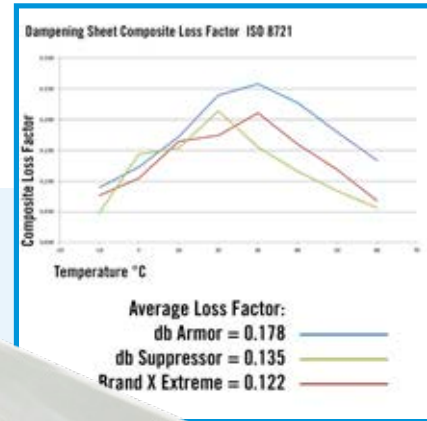

At only .051-inch (6 mil) thickness, db Armor™ can be applied in even the tightest spaces, and it can be adhered to steel, aluminum, finished fiberglass and plastic. db Armor™ acoustical energy suppression capabilities rival that of standard sound-barrier materials. Applying db Armor™ to any steel, aluminium, plastic or finished fiberglass surface will decrease structural resonance, producing a tighter, quieter and more comfortable ride. In addition, its adhesive backing provides solid and worry-free attachment.

## FEATURES

- 30% thinner and 20% lighter; provides superior sound-deadening capability than most products
- Lightest weight material with the thickest aluminum damping layer currently available
- Weight: 0.39 lbs per square foot
- 0.052 inch thick

PART NO.	DESCRIPTION
040012	21.5" x 39", 2 pack
040013	21.5" x 39", 5 pack
040014	21.5" x 39", 10 pack

# db Suppressor™

db Suppressor™ is a technologically advanced sound insulator that offers superior damping performance while weighing 10 percent less than similar products, yet possessing superior sonic energy-loss capacity. db Suppressor™ assists in reducing automotive interior noise levels and improves performance from auto sound systems by limiting panel resonance (vibration). It uses sheer force to reduce or eliminate vibration and features a lightweight butylene layer that is bonded to a 4mm anodized aluminum sheet. The butylene layer is loaded with a proprietary blend of ceramic micro-spheres, which reduce overall product weight and increase resistance to heat. The adhesive layer is very aggressive, and the bond will actually improve over time. db Suppressor™ can be removed and re-installed easily. Re-installation using a competitive material will not work; you will destroy the product while trying to remove it.

## FEATURES

- Weighs 10% less than leading acoustic dampener with superior damping ability
- Can be removed and re-installed easily
- Weights 0.48 pounds per square foot
- 0.060 inch thick

PART NO.	DESCRIPTION
040002	12" x 36", 5 pack
040003	12" x 36", 10 pack
040004	12" x 36", 20 pack
