Helix's series of bolt on factory [performance shocks](#) put you in control. Helix's polished hardened steel bodied shocks offer the ultimate performance, and look great too! These shocks are stronger, and smoother than comparable shocks and will directly bolt in your vehicle.

- Front kits come complete with 2 shocks for your vehicle.
- Rear kits come complete with 2 shocks for your vehicle.
- Front & rear kits come complete with 4 shocks for the front and rear of your vehicle.

Each shock shaft is a hard anodized steel body to deliver extra strength, while PTFE pistons, silicone bladders and titanium nitride coated shafts combine for smoother suspension movement and extra traction on bumpy surfaces. Helix's unique adjustable fittings guarantees a perfect fit for stock or custom application. Removable upper cap make rebuilding a clean and simple operation. Each shock offers a preinstalled clip for future upgrade to Coil Over shocks.

Standard Shock Kit: includes modular shock body and interchangeable adapters.

*Loop shock adapters shown as an example.

Change out the adapters for a perfect fit for your vehicle:

To Upgrade to Coil Over Shocks: Purchase our Shock Spring Cap (HEXSHXA2) and Threaded Shock Adapter with Perch (HEXSHXA1).

TIPS&TRICKS

Add thread lock to the threads on the upper and lower fitting threads. One little drop seals metal threads and locks against vibration loosening.
