

ADVANCED DIGITAL BATTERY CHARGER

KICBC2000 - 6V & 12V

Please read the following instructions carefully.

- 1** Disconnect battery from vehicle; negative (-) terminal first, followed by the positive (+) terminal.
- 2** Plug charger system to the battery, black wire to negative terminal and red to positive terminal.
- 3** Plug charger system into a standard AC source.
- 4** Enjoy not worrying about your vehicle's battery!

This digital battery charger system automatically cycles on and off as needed. RED indicator light shows power to unit and GREEN light lets you know when the unit is charging. When the GREEN light is off, the unit is not charging. The RED light will remain on, showing power to the unit.

CAUTION: Only for use with standard domestic AC power source. Do NOT connect to any other power source. European outlets may require an adaptor.
