Ken-Tool®
WHEREVER TIRES ARE CHANGED™

NINETEEN-FIVE™ TIRE MOUNTING & DEMOUNTING TOOL SET FOR 19.5" TRUCK TIRES

Everything you need to take the hassle out of changing 19.5" truck tires!

Specially designed to clear the hub and tackle those stiff, high ply, thick beads!

19.5" tires are notoriously difficult to mount and demount. This is partly due to the fact that they are stiffer tires with high ply ratings and thick beads. The NINETEEN-FIVE™ is designed to handle these tough tires and make your job easier, faster and safer!

- New tire bar uniquely designed to work on hub side of wheel — where hub protrudes above rim
- Specially designed ends manipulate tire with less effort
- Tools are powder coated to protect from rust and corrosion
- Forged from high-grade carbon steel and heat-treated for long-lasting strength and durability
- Specially designed Bead Holder to hold bead on 19.5" aluminum wheels
- Solid brass Bead Holder for steel wheels
- Aluminum Wheel Protector — thick leather pad helps protect rims from marring and scratching

Part No. 33199
Mounting/Demounting
Tool

31810	1	Aluminum Wheel Protector - Leather	6"	.35 lbs

Ken-Tool® Introduces the Nineteen-Five™

Tire Mounting and Demounting Tool Set for 19.5" Truck Tires

AKRON, Ohio (Dec. 4, 2009) - Ken-Tool, a leader and innovator in tire-service tools, announces the Nineteen-Five, a tire mounting and demounting tool set designed to make changing 19.5" truck tires easier and safer.

This specially designed tool set takes the hassle out of changing 19.5" truck tires, which are notoriously difficult to mount and demount due to their thick beads and high ply-rating internal construction.

This year, 19.5" truck tires have accounted for more than eight percent of new OE vehicle fitments and 10 percent of all OE replacement commercial truck tires sold.

The Nineteen-Five (# 33195) Includes:

- (2) Two Nineteen-Five Bars (# 33199) for mounting and demounting tires, measuring 38-inches each in length and only 3.5-pounds in weight
- (1) One patent-pending Bead Holder (# 33196) for 19.5" aluminum wheels, measuring 7-½-inches in length
- (1) One Solid Brass Bead Holder (# 31710) for steel wheels
- (1) One patented Leather Aluminum Wheel Protector pad (# 31810), which protects rims from marring and scratching

The tire bars are uniquely designed to work on the hub-side of the wheel where the hub protrudes above the wheel's rim. The unique tip designs at the end of the bars aid in the manipulation of the tire, and require less physical effort from the tire technician.

The Nineteen-Five tools and Bead Holder for aluminum wheels are forged from high-grade carbon steel and are heat-treated for long-lasting strength and durability. They are then powder-coated to protect against rust and corrosion for a long, trouble-free life.

About Ken-Tool

Ken-Tool is the leading manufacturer of tire service hand tools in the world. Headquartered in Akron, Ohio, Ken-Tool has been providing the tire industry and automotive aftermarket with quality products for more than 87 years.
