

Thunder Bass

Hard hitting, hard working MTX subwoofer

Convenient Size

Small size, but giant bass!

Easy Installation

Mounts quickly in most cars, trunks, and SUVs

Designed With 40 Years of MTX Experience

This universal amplified enclosure was designed for new enthusiasts looking to experience the awesome joy of adding great bass to their music, and for those hard core bass fans who unfortunately had to grow up and can no longer drive around with three 15" subs in their trunk.

RTP8A Highlights

- Amplifier Power Output: 120 Watts RMS
- 8" High performance subwoofer in a carpeted, vented enclosure.
- High Level and RCA inputs for easy connection in any system set up.
- External Bass Control is included for convenient control of volume from front of vehicle.

Elevate Your Sound

The 8" high output woofer used in this unit includes a lightweight and durable polypropylene cone that moves air more efficiently for impressive bass output that you can feel as well as hear.

The integrated class D amplifier can deliver up to 120 watts RMS power to the subwoofer using either high or low level inputs, so it is easy to connect to any type of radio.

Easy Mounting

The unit also includes an external bass control that can be connected to the amplifier and mounted near the driver allowing for subwoofer volume adjustment on the go.

This enclosure is an easy to use and install upgrade that any music enthusiast can take advantage of with little investment.
