

Perfect Starter System

The MTX TNE212D is an ideal solution for anyone looking to add bass to their vehicle's system without breaking their bank or going over the top. The TNE212D is the perfect combination of performance and value ensuring that enthusiasts of all types can enjoy the bass that MTX has built its reputation on for 40 years.

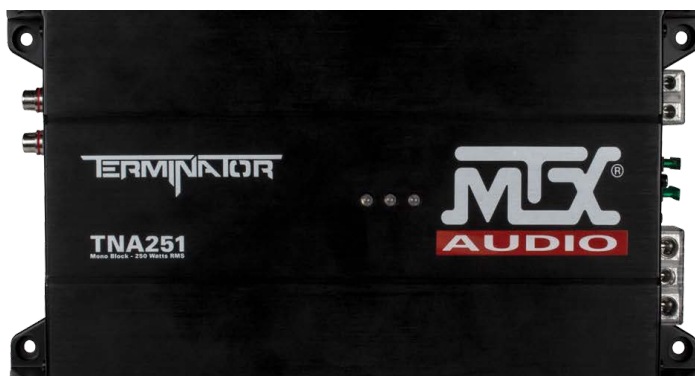

Unbeatable Bass and Unmatched Performance

The TNE212D combines great subwoofer design with perfect enclosure design to deliver bass that far exceeds expectations. Each subwoofer can handle 200-watts RMS power, 400-watts RMS for the entire enclosure.

High-Quality Construction

The enclosure itself is made using extra-strength 5/8" MDF (medium density fiberboard), which is the preferred material for subwoofer enclosures, ensuring the enclosure can contain the massive low frequency sound waves generated by the subwoofers without problem.

Rockin' Power

The included TNA251 is a 250 watt mono block amplifier that is easy to connect to any source, including factory radios, and that has been specifically designed for use with the TNE212D enclosure for optimal performance.
