

# HOW TO USE:

**Step 1:**  
Mix concentrated Non Acid into sprayer bottle using 4:1 mix ratio with water

**Step 2:**  
4 parts water / 1 part Non Acid

**Step 3:**  
Using a foaming trigger sprayer apply liberal amounts of Non Acid to wheels and tires. \*always use eye protection \*\*do not apply to hot wheels

**Step 4:**  
Allow Non Acid to dwell on wheel from 1-3 minutes. Agitate Non Acid with a tire brush if necessary. \*do not let Non Acid dry on wheels

**Step 5:**  
Allow Non Acid to dwell on tires from 1-3 minutes. Agitate Non Acid if necessary with wheel brush. \*do not let Non Acid dry on wheels

**Step 6:**  
Rinse wheels and tires with water. Preferably a power sprayer for non touch removal and cleaning

**Step 7:**  
Wipe dry residual water from wheel with a clean soft micro fiber towel
