Handling guidelines

Discs and player
• Use only discs that feature either of the following two logos.

• Use 12-cm discs.
• Use only conventional, fully circular discs.

- The following types of discs cannot be used with this unit:
  – DualDiscs
  – 8-cm discs: Attempts to use such discs with an adaptor may cause the unit to malfunction.
  – Oddly shaped discs
  – Discs other than CDs
  – Damaged discs, including discs that are cracked, chipped or warped
  – CD-R/RW discs that have not been finalized
- Do not write on or apply chemicals to the surface of the discs.
- To clean a CD, wipe the disc with a soft cloth outward from the center.
- Condensation may temporarily impair the player's performance. Let it rest for about one hour to adjust to a warmer temperature. Also, wipe any damp discs off with a soft cloth.
- When using discs that can be printed on label surfaces, check the instructions and the warnings of the discs. Depending on the discs, inserting and ejecting may not be possible. Using such discs may result in damage to this equipment.
- Do not attach commercially available labels or other materials to the discs.
  – The discs may warp making the disc unplayable.
  – The labels may come off during playback and prevent ejection of the discs, which may result in damage to the equipment.

USB storage device
- Connections via USB hubs are not supported.
- Firmly secure the USB storage device before driving. Do not let the USB storage device fall onto the floor, where it may become jammed under the brake or accelerator pedal.
- Depending on the USB storage device, the following problems may occur.

– Operations may vary.
– The storage device may not be recognized.
– Files may not be played back properly.
– The device may cause audible interference when you are listening to the radio.

- Do not leave the iPhone in places with high temperatures.
- Firmly secure the iPhone when driving. Do not let the iPhone fall onto the floor, where it may become jammed under the brake or accelerator pedal.
- Incompatible text saved on the iPhone will not be displayed by the unit.

Compressed audio compatibility

- Only the first 32 characters can be displayed as a file name (including the file extension) or a folder name.
- The unit may not work properly depending on the application used to encode WMA files.
- There may be a slight delay at the start of the playback of audio files embedded with image data, or audio files stored on a USB device with numerous folder hierarchies.

⚠ CAUTION
- Pioneer cannot guarantee compatibility with all USB mass storage devices, and assumes no responsibility for any loss of data on media players, smartphones, or other devices while using this product.
