ProMaxx toolboxes are the standard in rugged, weather-resistant toolboxes. These boxes feature a structured lid design which has an outer shell, an insulating middle layer and a unique reverse-beveled-edge lid liner. - High-strength body design
- Built-in storage on both ends
- Self-aligning lid latch pins
- Heavy duty gas shock lid
- Lockable handles

HEAT EXPULSION HOOD

UNIQUE 2-STAGE HEAT REDUCTION DESIGN

This hood uses 2 sets of fully functional vents to expel the maximum amount of heat to reduce under hood temperatures. The 2 vents on the side of the hood are strategically placed to give heat being pushed back towards the firewall a way to exit the engine bay when the JK is traveling at a high speed. A second set of vents, running the full length of the hood, expel rising heat from the entire engine bay when the JK is traveling at slower speeds.

INDUSTRY FIRST HYDA-CHANNELS KEEP THE ENGINE DRY

This hood features a pair of channels that run behind the cowl vents to divert any water away from the engine. It then dispenses it in the front and back of the engine bay, behind weather stripping, keeping your engine clean and dry.

LIGHTWEIGHT

This hood is made out of fiberglass to provide one of the lightest JK hood solutions on the market. At 25 lbs., this hood saves over 15 lbs. compared to the stock JK hood and even more when compared to some competitors.

METAL REINFORCED SAFETY LATCH LOCATION

A metal piece is grafted into the fiberglass where the stock safety hook is located to ensure the hook is mounted securely.
