License Plate Bracket Installation

Verify that License Plate Bracket will fit on your vehicle before installation.

1. Remove license plate bracket from packaging. Check to see if all parts from above table are included.
2. Remove license plate from vehicle using a screwdriver. Keep factory hardware, this will be used to reinstall license plate and bracket.
3. Place license plate on top of bracket. Insert factory hardware through holes in license plate and bracket. Fasten back in factory hole's on vehicle. All four fastner locations required for bracket installation
4. **(Optional)** Two 10007 or 10004 light bars (sold separate) can be installed on top of license plate bracket.

Refer to Wiring Installation on Light Bar Installation Instructions for wiring installation.
