POWER INTAKE™

For Turbo, Diesel, Supercharged and High Performance Engines

Product Information

Award Winning POWER INTAKE™ is a pair of inflatable block off bladders with a pressurized vapor pass-through that allows technicians to test an entire boosted intake and exhaust system, end to end, quickly and easily.

Compatible with PowerSmoke PRO™ and HD PowerSmoke™ or any brand high-pressure diagnostic leak detector. Built-in couplers make testing quick and simple.

Inflated with compressed air to conform to any size / shape intake or exhaust. Replicate the full load of a running boosted engine to perform service and repair on turbo, diesel, supercharged and high performance engines, with the engine safely off.

POWER INTAKE™ Can:

- Reduce diagnostic time
- Eliminate guess work
- Sell more parts
- Eliminate comebacks
