RedLine LumTronix rectangle headlights will fit all vehicles (Car, Truck, Motorcycle and Motorhomes) made from mid-1970's to 1988 no matter what country the vehicle was made or the company that made it. Fits many vehicles made after 1988 that uses a universal rectangle headlight or a universal size headlight such as Ford Econoline vans and Ford fleet trucks.

Ok, you started with OEM headlights and you quickly found out you are still not seeing the road. The old OEM convex parabolic lens of yesteryear with the prisms built right into the lens blocks approximately 50% of the light from escaping the headlight. Which means less light to see the road. In contrast, RedLine LumTronix crystal clear lens gives you 50% more light and is designed with a special side lens to extend past your retainer ring. This lens is inside a lens designed to provide more side light, truly a safety innovation. The Halogen bulb is blue but when turned on it illuminates a bright white light without a blue tint.

RedLine LumTronix "Home of the Original Classic Car Halo Headlight" has done it again by bringing to the market the most advanced headlight without a halo to the market. Unlike most headlights on the market today RedLine LumTronix specially designed headlight allows you to penetrate the darkness and brighter lighting systems of new cars driving toward you. You will see further down the road with more side light to have a truly 180 degrees of lighted viewing.
