

OLED Screen

Maximum comfort is attained by the use of an OLED (Organic Light Emitting Diode) numerical display. When compared to a traditional LCD display, the OLED display provides sharper contrast resulting in a deeper black for a crisp, clear images that is easier to read at a glance. The technology also allows for undistorted viewing angles approaching 170 degrees. The OLED display also does not require a backlight to be clearly visible at night, which gives the slim profile of the gauge – perfect for mounting in areas where space is an issue.

Features

Daisy Chain Compatible

The Revel VLS Water Temperature gauge is daisy chain compatible with other VLS gauges. This requires only one source of power for the first gauge in the series and utilizing the included daisy chain cable to power other gauges. This allows for a clean installation that avoids having many cables connected to a power source.

Parts Included

All Revel VLS gauges include the necessary hardware, sensors, and universal mounting pod and hood, as well as the installation instructions:

- (1) Water Temperature Gauge 2 1/16 in. (52mm)
- (1) Power Harness
- (1) Water temperature sensor and wiring harness
- (1) Mounting Pod
- (1) Sun Shade (hood)
- (1) 3M double sided tape
- (2) Mounting Bracket Threaded Extension
- (2) Washers
- (2) Nuts
- (1) Mounting Bracket
