What is a Workbench® Book?

Chapter 1:

Before You Begin. . .

Car Line Expansion

Technology Innovation

New Engine Building Process

Engine Longevity

Determining Your Engine Buildup Package

Dynamic Balancing 13 Crate or Kit

Rebuildable Core

Stroke and Compression

Horsepower and Torque

How Power Is Made

Tools and Equipment

Torque Wrenches

Keep a Clean, Organized Workshop

Chapter 2:

Disassembly

Engine Removal

The Noise Factor

Documenting Disassembly

Teardown

Electrical Components

Fuel System

Oiling and Cooling Systems

Valvetrain Components

Two-Piece Truck Induction

Balancer Inspection and Service

Chain Tensioners and Guides

Valley Crud

Chapter 3:

Selecting Parts

4.6L Engine Differences

SOHC Block

Casting Date Codes

Oiling System

Nodular Iron Crankshaft

Timing System

Connecting Rods

Pistons

Timing Cover

Two-Valve Cylinder Head

Three-Valve Cylinder Head

Composite Camshafts

Intake System

Oil Filter/Water Neck

DOHC Engines

Chapter 4:

Machine Shop

Be Environmentally Responsible

The Block

Rotating Assembly

Dynamic Balancing

Oil System

Cylinder Heads

Chapter 5:

Engine Assembly

The Block

Fasteners

Crankshaft and Camshaft Endplay

Cylinder Head Installation

Degreeing Cams

Final Assembly

Chapter 6:

Break-In and Tuning

Cooling System

Oiling System

Exhaust System

Electronic Engine Control

Ignition System

Dyno Tuning

Chapter 7:

The 5.0L Ti-VCT “Coyote”

The Goal: A Higher Benchmark

The Block

Rotating Assembly

Cylinder Head and Valvetrain

Induction

Exhaust

Lubrication and Cooling

Appendix A:

Engine Math

Appendix B:

Workbench® Reference Charts

Source Guide
