ROUND BASE MAGNETS

Standard round base magnet assemblies are made with ceramic magnets in steel base cups. They are magnetized together with the casings to create a holding force that is up to 32 times stronger than an individual ceramic magnet alone.

Neodymium rare earth magnets are extremely powerful and are nickel plated with a protective cover.

"The product holds up well. I fly the signs most of the ride and can get 6 months of use out of one banner!"

~Ed - Boise, ID

"We use SafeTruck products on our oversize loads because of the durability. They last much longer than any other flags or banners that we have used in the past! The color holds much better as well."

~William - Barto, PA

MESH BANNERS

Our mesh banners are made of 9 oz. vinyl-coated polyester that allow up to 30% airflow for less wind resistance. All mesh banners are double-stitched with edge binding top and bottom.

"I recommend SafeTruck Aluminum Signs to anyone!
 ALL of my safety products are ST/Ms. Carita - and as far as I'm concerned it is going to stay that way.
 I've used other products and your products out last them all!"
 ~Paul - Cheyenne, WY

WOOD SIGNS

Our wood signs are made from premium quality 3/8" DMDO (double medium density overlay). We seal the edges and prime the surface before coating with enamel. After printing they are top-coated to ensure a long service life.

"SafeTruck Wood Signs are easy to purchase, not too expensive, very durable, and the color seems to last a long time. SafeTrucks customer service is excellent as are the vendors I work with."

TANDEM AXLE STOP

The Tandem Axle Stop is designed specifically for adjusting your tandem axles. The Tandem Axle Stop fits both old and new suspension types so it's ideal for the fleet driver who pulls a different trailer regularly. The double ends also act as a counter balance to keep it firmly in place while sliding the frame to the desired location. P/N: MST110

- **START** getting it right the first time, every time.
- **START** adjusting your tandems without a spotter.
- **STOP** guessing where to stop while adjusting your tandems at the scales or for tight curvy roads.
- **STOP** climbing in and out of your rig multiple times for each adjustment.
- **FITS** both 1.5" and 1.75" frame holes.

How it works:

1. Release and latch the tandem retaining pin lever.
2. Place the Tandem Axle Stop in the hole next to where you want the tandem retainer pins to catch.
3. Lock your trailer brakes.
4. Pull forward or reverse until the tandems hit the Tandem Axle Stop.
5. Ease pressure off the Tandem Axle Stop just a little so it is easier to remove.
6. Unlatch and reset the tandem retaining pin lever, locking in the pins.
7. Remove the Tandem Axle Stop and go.
