

FAQ

ALERT SAFETY LIGHTS

Q: HOW LONG DOES ALERT LAST?

- Depending on which light mode is being utilized and what battery brand/type is being used, ALERT can last over 60 hours!

Q: CAN YOU SUBMERGE ALERT UNDERWATER?

- No! ALERT has an IP65 Rating, meaning they are tested to withstand wind, rain, and dust environments. They are not designed to be submerged underwater. Doing so may damage them permanently and will void the warranty.

Q: WILL THE MAGNETS ON ALERT HARM MY VEHICLE PAINT?

- No! The magnets featured on the back of each ALERT will not harm your vehicle's paint.

Q: IS ALERT D.O.T. COMPLIANT?

- Yes! ALERT is D.O.T. Compliant.

Q: WHAT ARE THE DIFFERENT LIGHT MODES?

- ALERT features nine unique light modes. These include: Triple Blink, Double Blink, Single Blink, Rotating, Alternating Blink, S.O.S. Emergency Distress, Solid (High), Solid (Low), and Flashlight Mode.

Q: CAN YOU PRIVATE-LABEL ALERT WITH MY LOGO?

- Yes! Private-label opportunities are available with certain minimum annual order quantities. Please contact us with your application, and we will provide you with complete program details.

Q: HOW DURABLE IS ALERT?

- ALERT can be run over by passenger vehicles without being crushed or destroyed. ALERT's non-slip grip helps prevent accidental drops; however, ALERT is tough enough to withstand accidental drops. ALERT is designed with an automatic safety shutoff if it experiences a violent drop, kick, or other harsh impact but will turn back on with the push of a button!

Q: WHAT ARE THE DIMENSIONS OF ALERT?

- Each ALERT measures 3.875" in diameter X 1.3125" thick.

Q: WHAT ADHESIVE DO THE MAGNETIC MOUNTS USE?

- Each Magnetic Mount features 3M 9448A Double Coated Tissue Tape that is designed for permanent installation. DO NOT apply the Magnetic Mounts to any surface that you do not want the Magnetic Mount to be permanently installed!
