38253 16 oz. Aerosol

Manufactured in the USA

# PREMIUM POWDER GUIDE COAT

## PREPARATION

Complete repair and allow primer to dry.

## MIXING

Shake can of **Premium Powder Guide Coat** vigorously for one minute after mixing ball rattles to prevent clogging. For best results, use when can temperature is approximately 70°F (21°C).

## APPLICATION

Apply a light “mist” coat over the area. Sand until **Premium Powder Guide Coat** can no longer be seen.
