STOPTECH RACING

From Test to Track

StopTech is Engineered for Performance and Driven by Passion

StopTech Racing is committed to helping our customers gain every possible advantage where seconds and inches mean the difference between winning and losing.

Our dedication has paid off with Championships and major wins in Road Racing, Off-Road Racing and Circle Track Racing -- markets we are fully engaged in supporting with a total system solution approach that top teams are embracing.

StopTech has scored victories and won championships in:

Road Racing

Circle Track

Off-Road

Race proven performance

- Shorter stopping distances
- Improved brake modulation and firmer brake pedal
- Improved thermal capacity

Trophy Race Brake Calipers

- Engineered specifically for motorsports competition
- Weight optimized caliper bodies
- Bolt-in bridge reduces yaw in increases stiffness
- Differential piston bore sizes for precise torque output
- Available in six, four or two-piston configurations

StopTech AeroRotors®

- Larger than stock diameter 2-piece rotors
- Patented AeroVane® cooling vane design
- Proprietary metallurgy resists cracking in extreme conditions

StopTech Racing Brake Friction

- Dedicated High Temperature Race Friction Material
- Unique Metallic, Carbon and Graphite Compounds
- More Predictable and Consistent Brake Engagement
- Available in 4 Different Dedicated Race Formulation

StopTech High Performance and Racing Brake Fluid

- Engineered for extreme racing temperatures
- Maintains viscosity, lubricity and non-compressibility

StopTech Braided Stainless Steel Brake Lines

- Stainless steel braiding reduces system compliance
- Better brake modulation, pedal feel, quicker responses

Titanium Nose Piston Assemblies

- Patented design blocks thermal radiation
- Works with StopTech calipers that have dust boot grooves

STOPTECH BIG BRAKE KITS

StopTech Big Brake Kits represent the ultimate high performance brake upgrade and give vehicles that supercar look and feel.

Balanced Systems That Retain Proper Front/Rear Bias
Patented Thermal Management Design for Less Fade
Increased Pad Volume for Sustained Stopping Power
Reduced Mass for Quicker Acceleration, Improved Handling
Kits Available for Street, Track Day and Full Race Duty

StopTech Big Brake Kits

High performance brake upgrades for road or track
Patented StopTech aerorotors for optimized airflow
Patented, billet aluminum aerohats further increase airflow
Ultra-stiff StopTech calipers
Patented bolt-in bridge for reduced compliance
StopTech stainless steel lines
Available in several powder-coated finish colors
All brackets and hardware to complete the job
Components made in the USA
Full ISO/TS 16949:2009 certification

StopTech Trophy Big Brake Kits

Race-optimized systems for track or street
Patented StopTech AeroRotors for optimized airflow
Patented, billet aluminum AeroHats further increase airflow
Weight optimized StopTech STR calipers
Patented bolt-in bridge
StopTech stainless steel brake lines
Race engineered caliper brackets
Hard-anodized finishes
Components made in the USA
Full ISO/TS 16949:2009 certification

STOPTECH AXLE PACKS

Pre-matched, direct-fit brake pad and rotor pairings that simplify brake service and brake system upgrades

Daily Commuter Duty
Towing or Hauling
Off-Roading
Weekend Canyon Carving
Track Day and Autocross Action

AXLE PACK

STOPTECH SPORT KIT

Complete brake system upgrades designed for high performance driving and light track use

StopTech Sport Brake Pads
StopTech Sport Brake Rotors
StopTech Stainless Steel Brake Lines

STOPTECH STREET AXLE PACK

Improved braking performance and enhanced looks over factory brake system with low dust and low noise

StopTech Street Brake Pads
StopTech Sport Brake Rotors

STOPTECH TRUCK AXLE PACK

Engineered for Trucks and SUVs that see heavier braking due to towing or hauling

StopTech Sport Brake Pads
StopTech Slotted Sport Brake Rotors

STOPTECH SELECT SPORT AXLE PACK

Improved performance and looks with drilled and slotted rotors and premium pads

StopTech Street Brake Pads
StopTech Select Sport Brake Rotors

STOPTECH SPORT

Sport components improve the performance of stock brake systems utilizing factory calipers with no modifications to install

- Increased thermal capacity and cooling
- Shorter stopping distances
- Improved system modulation and feedback

StopTech Street Brake Friction

- Quiet Braking Performance for "Street" Driving
- Rotor-Friendly, Low-Dust Material = Cleaner Wheels
- Premium Hardware Included Where Required
- Platform Specific Friction Compounds Match O.E.
- Ideal for Daily Driving and Touring Duty

StopTech Sport Brake Friction

- High Max Operating Temperature to Eliminate Fade
- Excellent Actuation, Modulation and Release
- Para-Aramid Composites for Linear Response
- Ideal for Autocross and Light Track Day Use

StopTech High Performance and Racing Brake Fluid

- Str-600 and higher boiling point str-660 formulas
- OE compatible dot 4 motor vehicle brake fluid
- Engineered for extreme racing temperatures
- Maintains viscosity, lubricity and non-compressibility

StopTech Braided Stainless Steel Brake Lines

- Stainless steel braiding reduces system compliance
- Better brake modulation, pedal feel, quicker responses
- Pvc cover protects against abrasion and chaffing
- Precision reinforced end fittings
- Hundreds of applications

All StopTech and Centric Parts brake friction compounds are engineered in compliance with state and federal statutes regarding copper content.

Sport components improve the performance of stock brake systems with no modifications to install and utilize factory calipers

Increased thermal capacity and cooling
Shorter stopping distances
Improved system modulation and feedback

StopTech Sport Brake Rotors

Direct replacement 1-piece rotor upgrade
Available slotted, drilled and drilled+slotted
Increased bite and thermal capacity
Corrosion resistant E-coated finish
Better wet and dry stopping performance

StopTech Select Sport Brake Rotors

Direct replacement 1-piece rotor upgrade
Drilled+slotted design improves bite and thermal capacity
Zinc-plated finish
Improved stopping performance

STOPTECH
CRYO LABORATORIES

Cryogenic Treated Rotors

One-time stress relief process
Involves cold & heat cycling of the brake rotor
Improved service life and performance

*Any new StopTech or Centric Premium 1-piece replacement rotor can be cryogenically treated prior to shipment. Cryo treatment typically adds 5-7 business days for processing. Contact your retailer for pricing.

POSI QUIET BRAKE PADS

Posi Quiet brake pads are engineered and tested to provide maximum performance, extended service life and eliminate noise and dust.

- Application specific, lab-developed friction formulas
- Extensive dynamometer and on-car validation
- 100% Positive molded
- 100% scorched for improved bed-in
- Precision cut backing plates
- Multi-layer mechanically attached shims
- Application specific hardware included where required
- Copper-free friction formulas

Posi Quiet

- Posi Quiet Semi-Metallic Brake Friction**
- Excellent stopping power at all temperatures
- High initial bite
- Copper free friction formulas

- StopTech Street Brake Friction**
- Extremely quiet and fade resistant
- Low dust formulas
- Increased rotor service life

- StopTech Racing Brake Friction**
- Longest wearing friction compounds
- Extended rotor service life
- Recommended for HD and fleet applications

CENTRIC PREMIUM REPLACEMENT

Centric Parts is the leading manufacturer and supplier of replacement brake components for import and domestic vehicles.

Backed by award winning cataloging
In-house engineering and testing facilities

Nationwide distribution network

Unparalleled technical support

Centric Parts sets the standard in the automotive aftermarket.

Centric Premium Brake Rotors

O.E. Style symmetric vane castings

Black E-Coating

Double disc ground

Mill Balanced

Proprietary high carbon metallurgy

Reduced pad squeal

Improved performance in high-heat situations

Increased friction couple

Reduced corrosion

Centric Premium Metallic

Excellent stopping power at all temperatures

Low dust friction formula

Excellent fade resistance

Centric Premium Ceramic

Long wearing advanced ceramic compounds

Increased rotor service life

Excellent fade resistance

CENTRIC PREFERRED AXLE PACK

Premium direct-replacement parts that offer low dust, low noise, improved service life and improved performance.

How to Use the StopTech Parts Numbering System

The StopTech Parts numbering system is specifically designed to easily identify both the type of part and, with the exception of friction group products, the type of vehicle the part fits. The StopTech numbers follow this pattern:

XXX . XXXXX

For all product groups, the first three (3) digits (**xxx . xxxxx**) are the part number prefix, which identifies the product group. Please refer to the following page for a complete listing of Brake System Product Groups.

With the exception of friction group products, the next two (2) digits (**xxx . xxxxx**) represent the vehicle make. The final three (3) digits (**xxx . xxxxx**) represent the specific part number.

For Friction Group Products, StopTech references the industry standard FMSI 'D' number for pads in its numbering system. Following the same pattern as above, the first three (3) digits (**xxx . xxxxx**) are the part number prefix which identifies the friction compound. Please refer to the Brake System Product Groups for a complete listing of these compounds. The next four (4) digits (**xxx . xxxxx**) are based on the FMSI 'D' number. The fifth (5) digit (**xxx . xxxxx**) represents a variation in the brake pad design or thickness, or variation of the supplied and/or attached hardware.

Please see the following examples as a general guideline:

126.45071 This part number is identified as a Slotted Brake Rotor (126) for a Mazda (45).

977.33003 This part number is identified as a Sport Brake Kit with Slotted Rotors (977) for a Audi/Volkswagen (33).

309.03940 This part number is identified as a StopTech Street Performance Brake Pad (309) to FMSI D394 (0394) pad shape. Similarly, in the part number 106.09741, the part identifies a Extended Wear Brake Pad for an FMSI D974 pad shape, but with a thickness variation from the 106.09740.

950.34005 This part number is identified as Stainless Steel Brake Line Kit (950) for a BMW (34).

FMSI® and FMS® are registered trade marks of the Frictions Materials Standards Institute, Madison, CT, U.S.A., and the proprietary part numbering system is owned by FMSI.

Stainless Steel Brake Line Part Numbering Notes

It is possible to order StopTech stainless steel brake lines correctly **ONLY** by following the listings in this catalog.

Centric OE replacement brake line part numbers begin with 150. StopTech stainless steel brake line part numbers begin with 950. Nevertheless, it is **NOT** possible to generate a correct part number simply by replacing the 150 prefix (150.xxxxx) with a 950 prefix (950.xxxxx).

Though both are flexible brake hoses and perform basically the same function, 150 and 950 part numbers are **NOT** similar classes of product in the way a 105.06090 brake pad and a 104.06090 brake pad are similar. Just as there is a 120.47024 and a 141.47024, and both are parts for Subaru vehicles, 150 and 950 part numbers must be considered to be completely different types of product. It would only be by coincidence that similar part numbers applied to the same vehicle.

Slotted, Drilled, and Drilled and Slotted Rotors

StopTech Sport Rotors are not StopTech AeroRotors. StopTech Sport direct replacement rotors fit stock calipers and have vane designs identical to those of original equipment rotors, with drilling and/or slotting features added. StopTech Sport rotors have a durable black coating on the non-swept areas of the rotor to prevent unsightly corrosion, and meet or exceed original equipment quality specifications. The machining patterns in all StopTech Sport rotors are engineered for maximum rotor integrity, and will provide outstanding service on any street-driven vehicle. However, slotted rotors (126 series) have proven to be the most durable under severe use.

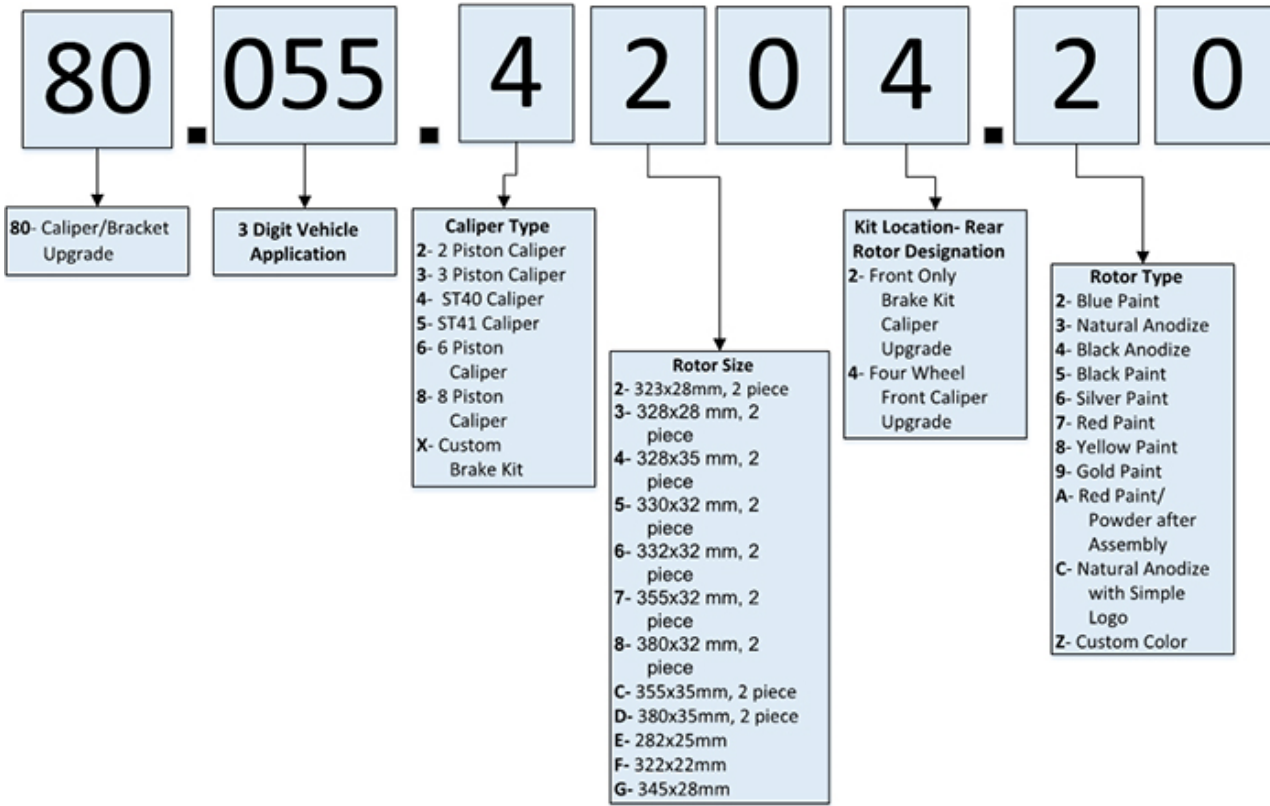

Stainless Steel Brake Line Application Notes

The following key details notes regarding special considerations for specific Stainless Steel Brake Line Kit applications:

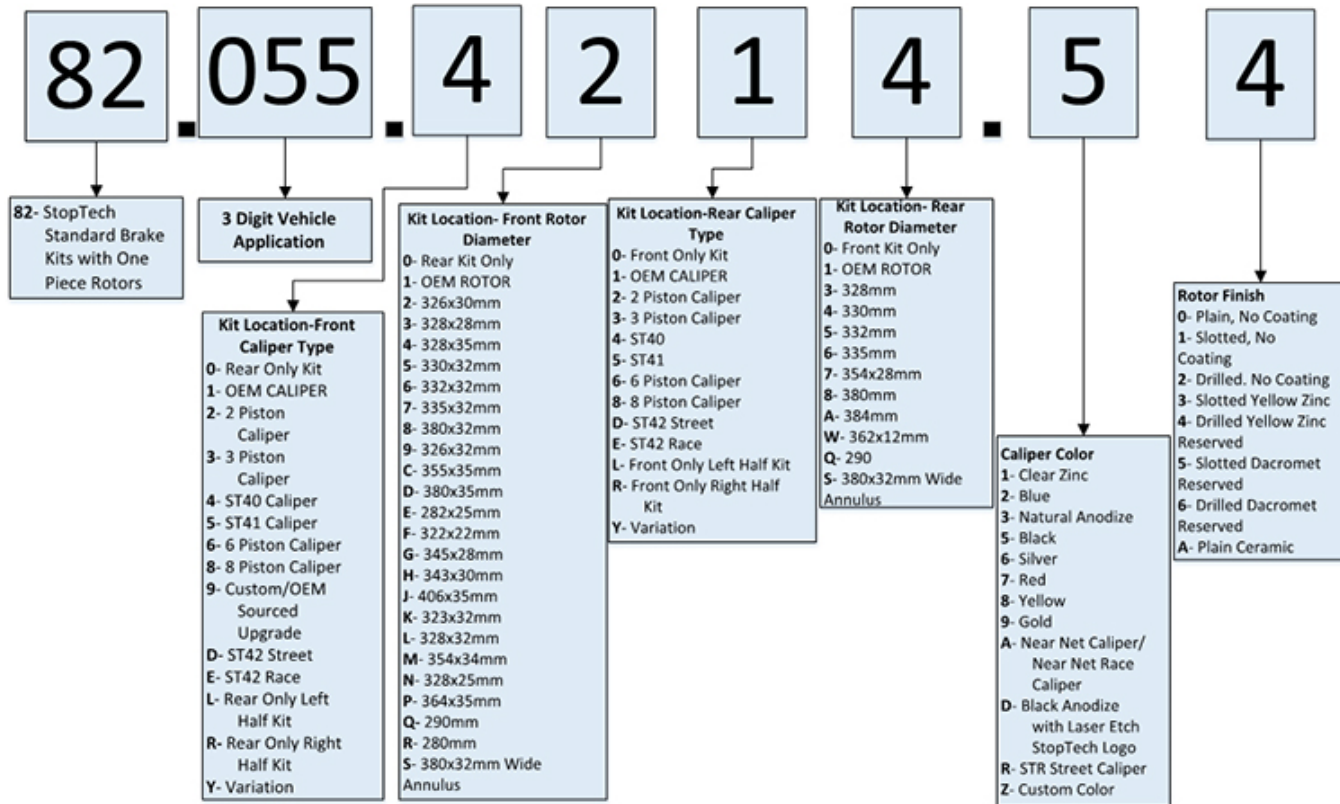

- 1 = Front SS Line Kit replaces lower lines only
- 2 = Rear SS Line Kit replaces lower lines only
- 3 = Front SS Line Kit requires modification
- 4 = Rear SS Line Kit requires modification
