

TIMKEN

Wheel Bearing Retainer Clips

The Tools to Do the Job Right the First Time

Many Generation 1 bearing designs require a retainer clip, which may need to be replaced when the bearing is changed. Timken wants to make sure you have the products that you need to do the job right the first time. We offer bearing retainer clips for thousands of applications including the most common makes and models on the road today. See the following pages for a listing of applications.

We offer Timken® retainer clips that:

- Align with stringent Timken quality standards
- Are engineered to OEM specifications
- Provide a secure fit without scoring the inside of the bore
- Provide ease of installation with a universal design that reduces notch configurations
- Offer notches set for optimum access using traditional snap ring pliers
- Are cataloged to the year, make and model of the bearing application

Timken® Retainer Clip Application Guide

Part No.	Application
RET21	Scion-iQ, xD (2012-2015); Toyota-Yaris (2007-2016)
RET34	Mitsubishi-Lancer, Outlander (2006-2007)
RET35*	Honda-Civic (1988-1990)
