2. Unplug the wiring harness leading to the bumper, (**Figure 1**). Move all wiring harnesses away from bumper.
3. **Determine if vehicle is equipped with factory receiver hitch**

Models without receiver hitch:

- a. Place blocks or jack stands under the bumper to support it during mounting bolt removal. Once the bumper has been safely supported, remove the factory hex bolts attaching the bumper brackets to the sides and bottom of the frame and slide the bumper assembly off of the vehicle.

Models with factory receiver hitch:

- a. Remove the plastic cover from the top of the bumper, (**Figure 2**). **NOTE:** Cover is attached at top, back and bottom by several plastic clips. Remove these pins to release plastic cover.

- c. Secure sensor to the sleeve with (2) 4mm x 10mm Button Head Screws, (**Figure 7**). **IMPORTANT:** Sensors fit snug in sleeves. The 4mm Bolts are used to apply slight pressure to lock the sensors in place. Tighten both screws evenly until they touch the sensor body only. Do not overtighten screws or damage to sensors will result.
- d. Repeat **Steps 6a & 6b** to install the remaining (3) sensors.

7. Attach the wiring harness to the sensors and trailer plug. Use the included Wire Ties to secure the wiring harness to the bumper and frame as necessary.
