TrailReady

EXTREME DUTY BUMPERS

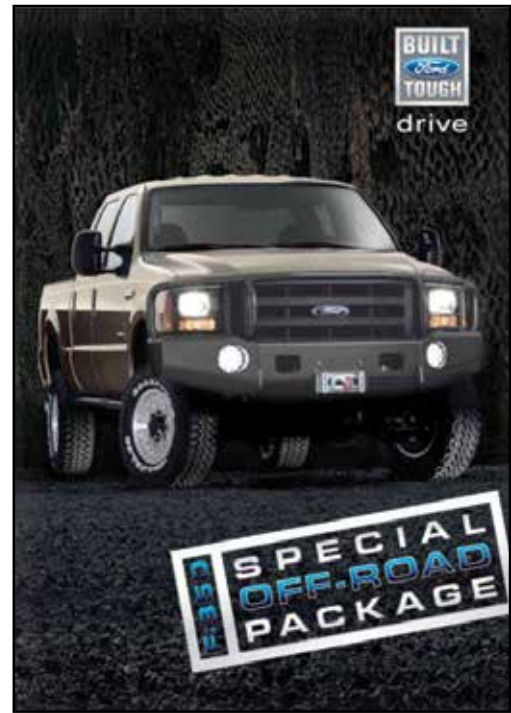

PREMIUM SERIES

TECHNICAL FEATURES*

TrailReady products are engineered to be used and abused. A perfect match of form and function – great looks and brute strength.

- **Construction** Truck bumpers are constructed from 1/4" steel in the winch-mount center section and 3/16" outer wings. The bumper is fully welded – inside and out – and engineered with internal box-type structure.
- **Frame Mounting** Chassis mount sub frames are 1/4" steel minimum directly attaching to vehicle frame. Mounting is fully adjustable up, down, and side to side for a perfect fit every time.
- **Winch Capacity** TrailReady bumpers are engineered for a giant 16,500 pound pulling force. Frame Mounts are braced for extremely demanding off-camber side pulls. Most 4½"x 10" bolt pattern winches to 16,500lbs can be installed.
- **Shackle Mounts** Positioned in-line with the pulling moment of bumper for maximum functionality. Designed for 1" shaft shackles
- **Weight** Optimized strength to weight at 170 lbs for base bumpers.
- **Winch Access** Functional access to controls and cable through 4" x 20" opening on top of bumper
- **Powdercoat** The best double coat. Full sandblast, acid etch, primer coat, and top coat. Mini-tex black is standard - semi-flat lightly textured finish.
- **Light Ports** Quad ports with universal fitment for nearly any post mount 6" and 4" lights – Fog, Driving, Spot, HID, LED, Halogen. Rectangular ports are available as an option.
- **Cooling Inlets** Large airflow to the radiators essential for diesel performance
- **Styling** Aggressive compact shape. As small as possible while maintaining fully enclosed winch capacity. Soft, rolled edges compliment OEM styling.

*Full-sized vehicle applications

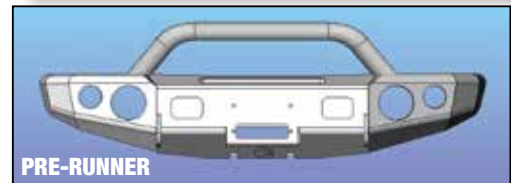

**Chosen by Ford Motor Company
as a key component of their Special
Off-Road Package**

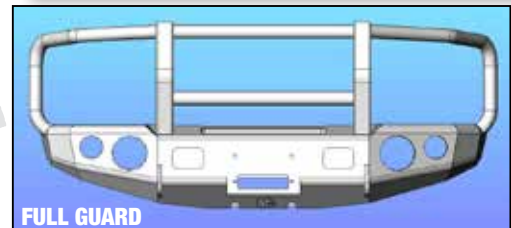

FOUR MODELS:

BASE BUMPER

PRE-RUNNER

FULL GUARD

REAR BUMPER

EXTREME DUTY BUMPERS

LIGHTING

Quad Light Ports

- Universal mounting for nearly any round 6" and 4" lights with post style mounts
- Suitable for fog, driving, or spot lights. HID, LED, or Halogen – Big reflectors throw more light!
- Rectangular (LED) ports are available as an option

CONSTRUCTION

- Engineered to be used and abused
- 1/4" steel center section and 3/16" outer wings.
- Fully welded – inside and out
- High strength internal box-type structure.
- Engineered for an enormous 16,500 pound pulling force. Frame Mounts are braced for extremely demanding off-camber side pulls.
- Full Guard grill tubing is 2-1/2" diameter throughout with fabricated 3" upright sections.
- Pre-Runner Guard – not just for looks – it can take an impact. Tubing is 3-1/2" diameter with super-stout 5" to 6" fully welded footprint
