## WILLY'S SUPER BOWL

Willy's Carburetor & Dyno Shops new and revolutionary Super Bowl is taking the carburetor world to a whole new level. The world's ONLY carburetor with NO needle and seat and NO float! This system increases throttle response, eliminates fuel foaming and maintains a consistent fuel level in the bowl which keeps the jets covered. This gives you 4 more cylinders while cornering on 8 cylinder applications. This system also eliminates "leaning of the engine" while cornering which in turn, reduces risk of burnt pistons.

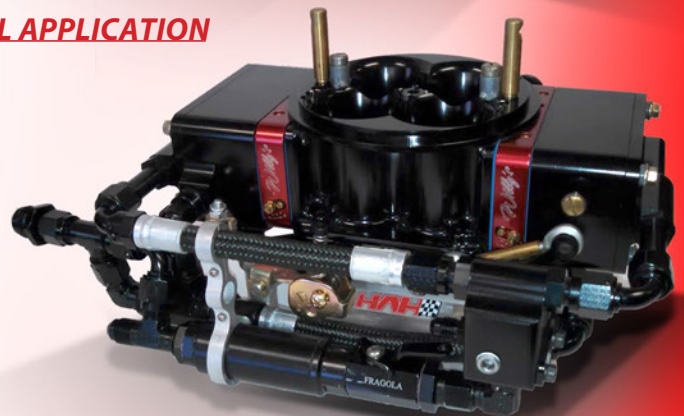

This system will give you a huge advantage over the competition especially on starts and cornering.

The system is available on new carburetors or our shop can equip your existing carburetor with the Willy's Super Bowl system for gas, methanol or ethanol. It is also available for 2 barrel or 4 barrel applications.
