

INSTALLATION INSTRUCTIONS

Models 350 & 360

Your purchase of a Wolo horn is a perfect choice to compliment your vehicle. Wolo's products are manufactured with the finest materials. Each horn is tested to ensure it meets all manufacturing specifications, before it is packaged.

MOUNTING:

1. Locate an area in the engine compartment that is dry and safe from the exhaust manifold heat.
2. Mount the speaker with the opening facing downward, this will help prevent dirt and water from entering into the speaker.
3. Using the mounting bracket as a template, mark the hole locations and, drill three-(3) 1/8" holes and secure the speaker with screws provided.

WIRING: Fig. 1

4. Red wire is connected to (+) 12 volts positive such as the battery, alternator, etc.
5. Black wire: is connected to the horn switch.
6. The horn switch's other terminal is connected to ground, (body of vehicle). **Important:** A good ground connection should be free of rust and paint. Installation is complete.
7. Always make sure that the horns electrical circuit is protected with a 3-amp fuse to protect the vehicle.
